HUTTON KLEIN  
**HK**  
DERMATOLOGY

## Exciting Office Announcement

We are excited to announce that we now offer  
**Superficial Radiation Therapy (SRT) for Keloids!**

Studies show there is a 90%+ success rate  
with excision of the keloid followed by one to three days of SRT Treatments.

## Introductory Offer Free Consultation!

Scar excision followed by 1-3 days of SRT treatment  
Treatment may be covered by your insurance company

## Hypertrophic scars

excessive collagen deposits appear raised, but not to the degree observed with keloids

## Keloid scars

can appear as a firm, rubbery lesion or shiny, fibrous nodules

A keloid is a scar caused by an excessive amount of collagen and fibrous tissue in the area, causing distortion, itching, and sometimes pain. Unlike hypertrophic scars, keloid tissue tends to grow beyond the boundaries of the original scar. A hypertrophic scar is a thick and raised scar in which the excess tissue remains within the boundaries of the original injury. This is not a treatment for hypertrophic scars.

## Office Announcements

§ **Happy Retirement...** We are sad to announce nurse Pauline will be retiring at the end of August. Please take this opportunity to say goodbye at your next visit.

§ **Blessings...** We are excited for Jasmin as she will be welcoming her new bundle of joy in August. Jasmin plans an extended maternity leave starting in August.

§ **New face at the check-in desk:** Please welcome Linda to the practice. Linda spent the last 23 years at a medical office in Newport Beach. Luckily for us, Linda got tired of the heavy traffic during her commute and decided to join our family!

§ **Shingles Vaccine:** One in three adults over the age 50 will develop painful Shingles in their lifetime. We recently received additional doses of the Shingles Vaccine which we will offer to patients on a first come, first served basis. The vaccine has been back-ordered and is difficult to get. It is recommended that patients receive two doses. We are charging \$200 per dose. You simply need to make an appointment with the nurse to receive the vaccine. **You may purchase one dose at a time, or you can prepay and reserve your second dose given two months after the original dose.**

§ **Computer System:** Soon patients will receive appointment reminders via automated phone messages, emails and/or texts. We will happily accommodate patients preferring a postcard for their 6 -12 month return visits - just let us know. We thank you for your patience with minor glitches in payment posting. No worries if you were one of the few patients that received a bill in error due to an delay in applying the payment to your account - most accounts have already been corrected with an easy fix.

## Protect your skin from the inside- out! Introducing... Heliocare!
