

## NO CHILD POLICY

It is our policy that children over the age of 8 WEEKS cannot be brought into the office. This is not intended to be an inconvenience or hardship for our patients with children. It is simply for the protection of our pregnant mothers and their unborn children. Some children may have an infectious illness and may not show symptoms. Their exposure to our pregnant mothers could be a health threat to them/or their unborn child. For this reason, we ask that you only bring the child in for the postpartum visit, and/or as long as the child is under 8 WEEKS OLD. If this presents a problem, please call the office to reschedule your appointment for a more convenient time.
