Contour The Body You've Always Wanted...Just in Time for Summer!

"LAPEX BCS Pro & LAPEX Davan are the one and only original, LLL (LowLevelLaser) assisted, non-invasive, highly effective, FDA cleared and internationally patented Body Contouring medical device"

*Lapex is registered trademark of Medidian Co. Ltd., South Korea

MD Supervised, Full Body Contouring No Suction, No Surgery, No Pain, FDA Approved

Your Treatment is Totally Non-Invasive and Painless.

The LAPEX PRO & DAVAN means no surgery and no suction. It uses 21st-century technology to simply and easily liquefy fat cells and have your body eliminate them naturally.

HOW IT WORKS:

The LAPEX BCS Pro & Lapex Davan are 100% non-invasive and use low level red laser energy to painlessly penetrate the skin stimulating targeted subcutaneous adipose (or fat) cells. When liquified and the cells begin releasing water, free fatty acids, and glycerol (Triglycerides), the adipose are released through the pores on the cell membrane thereby reducing the overall size of the area. You lose inches wherever you desire, even the whole body, while relaxing and enjoying music! This cell-metabolism-based medical procedure is bio-friendly, safe with no side effects, and FDA approved.

Facials and Chemical Peels

We provide the best facial and chemical peels for your skin. Whether it's a facial for acne, anti-aging, bee venom, deep pore cleansing, oxygen, express, deep cleansing of the back and neck or even a food facial we have it all. We customize the facial you need. Laser skin resurfacing is also available.

Express Facial-30 mins

A mini facial perfectly suited for those on the go, complete with cleansing, exfoliation, toning. Fast and efficient design to refresh your complexion between full facial visits.

Deep Cleansing Facial- 90 mins

A deep pore cleansing treatment reduces congestion and refines the skin. Includes exfoliation, extraction, detoxifying massage and a customized mask. Leaves your skin clean and soft.

Acne treatment- 90 mins

A highly specialized treatment that deals with the skin that is prone to acne breakouts. This facial clears the skin without discoloration and painful lesions.

Deep Cleansing Back Treatment- 90mins

This treatment starts with the cleansing, exfoliation and extraction of impurities from hard to reach areas stimulating circulation and cell renewal. This is followed by a massage, releasing any residual toxins.

Gentleman's Facial- 60mins

This specialized facial addresses the often neglected needs of a man's skin including the prevention of ingrown hairs, soothing razor burns and correcting damaging results from daily shaving and sun damage.

Oxygen Facial-60mins

This treatment is designed to clear skin congestion, detoxify, control acne and normalize skin leaving you feeling refreshed, revitalized and renewed.

Chemical Peel- 30-60mins

According to your facial consultation conducted by a professional the concentrated peel is formulated to deeply exfoliate the skin and specializes in reducing fine lines and wrinkles while also reducing hyperpigmentation and melasma.

Body Contouring

We provide free consultation for weight loss procedures such as cellulite reduction treatments, Autologous fat transfers, Lapex laser lip and laser cavitation. We also provide a weight loss program to follow up after procedure to help keep your desired weight.

Laser Hair Removal

Say goodbye to unwanted hair. Prime Care Med Spa is dedicated to reducing unwanted hair anywhere on the body through the effective laser hair removal technology. Problem areas:

- Face
- *Lip *chin *sideburns

- Lower body
- *Feet *Toes * Bikini *Brazilian *Buttocks

- Full body
- *Legs *Underarms

- Upper body
- *Hands *Fingers *Stomach *Chest
- *Back *Shoulders *Neck *Back of Neck

Botox and Dermal Filler

BOTOX is the only FDA-approved nonsurgical treatment administered by a physician for the temporary reduction of moderate to severe frown lines between the brows in patients 18-65 years of age. There's little to no down time and in ten minutes for a few tiny injections within days there's a noticeable difference.

Dermal fillers are a popular treatment for wrinkles and facial lines. This procedure helps "fill out" and smooth away troublesome areas. Dermal fillers are also effective in increasing fullness to narrow lips, enhancing sunken cheeks, and contouring the bridge of the nose.

- *Glabellar Frown Lines
- *Brow Lift
- *Hyperactive Mentals (Dimpled Chin)
- *Vertical Platysmal Bands
- *Horizontal Forehead Lines
- *Crow's Feet
- *Nasalis Muscles (Bunny Lines)
- *Gummy Smiles
- *Perioral Lines (Vertical Lip Lines)
- *Horizontal Neck Lines

- Dermal Fillers
- *Nasolabial Folds (smile lines)
- *Mentals
- *Lip augmentation & Sculpting
- *Tear Troughs
- *Asymmetrical lip correction
- *Oral Commissures
- *Jaw contouring
- *Pre-Jaw Sulcus

LED Light Therapy

After our professional performs exfoliation therapies such as microdermabrasion, cosmetic peels and/or oxygen infusion. We offer L.E.D Light Therapy to stimulate your skin for a youthful appearance.

Light therapy offers a powerful yet gentle means for obtaining more beautiful skin. It gives you the opportunity to treat an array of skin concerns without chemicals, drugs, or invasive measures. The skin responds quickly and very positively to the different colors in the spectrum. Your skin therapy may be individualized depending on your skin type, condition and color. We also offer L.E.D Light Therapy to be used as a stand-alone procedure after a cleanse and toner.

Red L.E.D Light Therapy - Rejuvenating

Red light is good for all skin types. It rejuvenates the skin by improving blood flow and increasing collagen production. It shows improvement with sensitive, aging and sun damaged skin. Red is the primary color before any other L.E.D color used. It is essential with the first step of cell growth.

Yellow L.E.D Light Therapy - Toning

Yellow light stimulates the nervous and lymphatic systems, toning and strengthening the muscles under the epidermis, bringing tightness back to skin, aiding the anti-aging process.

Orange L.E.D Light Therapy - Vitalizing

Orange light returns a vitality to skin that has lost its sheen. Especially recommended for wedding days and portraits, orange light works on dull complexions to bring out a brilliant healthy glow.

Green L.E.D Light Therapy - Calming

Green light is found at the center of the visible spectrum, bringing balance and calm to the skin and reducing redness. The calming effect also has anti-inflammatory properties and can even help reduce hyper-pigmentation.

Blue L.E.D Light Therapy - Relaxing & Purifying

The blue wavelengths has a powerful anti-bacterial properties that cleanse and purify the skin. They kill the acne-causing bacteria and has anti-spasmodic properties that relieves tension. This also shows improvements with non-inflamed oily and troubled skin.

Microdermabrasion

Microdermabrasion uses a highly controlled flow of fine, medical grade crystals to remove the dead, outermost layer of skin. This skin exfoliation process reveals the new, living skin cells that are soft, smooth and receptive to nutrients. Microdermabrasion is a safe, non-surgical resurfacing procedure performed by a certified professional.

It is an ideal treatment for young or old, male or female and for all skin types. Although mainly used on the facial area it may also be performed on the chest, back, shoulders or other areas as required.

Medical microdermabrasion is an effective skin rejuvenation procedure that requires no downtime, allowing patients to resume normal activities immediately after the procedure. The procedure is extremely popular because it is painless yet effective with minimal redness, swelling or irritation. Microdermabrasion is commonly used to treat and diminish:

- Fine Lines and Wrinkles
- Sun Damaged Skin
- Acne Prone Skin
- Blackheads and Whiteheads
- Superficial Age Spots
- Hyperpigmentation
- Dry Skin
- Dull or Patchy Skin

Removals and Extractions

Most moles and severe blackheads are removed surgically. If the mole and blackhead is small, the procedure can be done quickly and easily, in our office, using local anesthesia. The procedure may be a simple excision, which usually leaves a thin, barely visible scar.

Microneedling

Newly innovated treatment for fine lines, acne scars and improvement of the skin's texture, tone and color. This is used to create controlled micro-injuries to the skin in order to produce collagen and elastin.

The skin's repair process results in a thicker dermis with softer wrinkles.
