

DENTAL X-RAY CONSENT FORM

Dental xrays allow the Dentist to diagnose and treat conditions that cannot be detected during clinical examination. Dental xray films detect much more than cavities. For example, xrays may be needed to survey erupting teeth, diagnose bone diseases, evaluate the results of an injury or plan orthodontic treatment.

If dental problems are found and treated early, before they become visible or painful, dental care is much more comfortable and affordable. Dental xrays are part of a comprehensive oral examination. However, your dental insurance may not cover the xrays.

- New dental xrays may be taken. I understand that they may or may not be covered by my dental insurance. I understand that I am responsible for all fees if my insurance does not pay for the xrays.

- I request that no dental xrays be taken today. I understand that some dental pathology cannot be diagnosed without the used of xrays. I hereby release the smile Fairy Dental Spa form responsibility for any oral conditions possibly present of which go undiagnosed as a result of my request for not having dental xrays taken.
