

SCN Trifecta

SCN trifecta body contouring program is a multi-modality approach to lose generalized and/or focal weight loss. After evaluation of each patient by our Board-certified physicians or providers, each patient is recommended a specific weight loss and body contouring program which may contain all or some of the available treatment modalities, which include SculpSure, IV therapy, RF contouring, and dietary regimen. It is a program in which each patient will work closely with the staff of SCN to achieve the most optimal results in the most scientific and safe way.

Chang B. Son, MD
Denisse Serrano, PA-C
Bin Bin Fan, PA-C

SCN Dermatology is a full-service Dermatology Center with three offices in NJ and NYC. SCN Dermatology is founded by Dr. Chang B. Son who is a Board-Certified Dermatologist with Internal Medicine training at the Brigham and Women's Hospital at the Harvard University and Dermatology training at the Yale University. Denisse Serrano, PA-C received her undergraduate degree from Rutgers University and physician assistant degree from UMDNJ. Bin Bin Fan is a graduate of Cornell University and completed his physician assistant program at the Penn State University. Both providers underwent vigorous post-graduate Dermatology training both outside and within SCN. SCN Dermatology is also uniquely multi-lingual with staff and providers fluent in English, Spanish, Chinese, Korean, and Portuguese.

CYNOSURE

SculpSure®

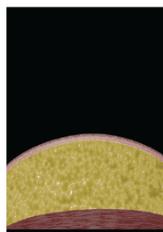

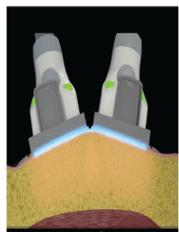

Noninvasive Fat Removal Treatment

FDA cleared contouring system that removes stubborn fat by targeting and destroying treated fat cells

BEFORE

DURING

AFTER

Four Contouring Frames
Customize Treatment for Each Client

Laser Light Energy
Raises Temperature to Destroy Fat

Fat Cells Are Eliminated
by the Body's Lymphatic System

Each 25-minute treatment can destroy up to 24% of treated fat cells without surgery

Common Areas Treated

- Double Chin
- Abdomen
- Love handles
- Back
- Inner and outer thighs

Results

Patients may start to see results as early as 6 weeks following treatment as the body begins to evacuate the destroyed fat cells, with optimal results usually seen at 12 weeks

No surgery. No downtime. Just results.

IV Therapy

IV weight loss drips can:

- Boost metabolism
- Convert food into energy
- Help burn fat
- Detoxify your body
- Remove free radicals from your body
- Combat fatigue

Main Ingredients

Methylcobalamin (B12)

- Converts food to glucose
- Assists in fat and protein metabolism

Methionine

- Prevents excess fat buildup in liver

Inositol (B8)

- Aids in metabolism of fats and helps reduce blood cholesterol
- Associated with serotonin, which controls mood and appetite

Choline

- Promotes weight loss and lowers body fat percentage
- Promotes breakdown of fats by transporting dietary fats throughout the body so they are burned for energy

Let science take care of your fat.

RF Skin Tightening

Radiofrequency (RF) energy heats tissue and induces tissue remodeling.

- Stimulates subdermal collagen production
- Production of collagen and elastin
- Wrinkle reduction
- Cellulite improvement
- Body contouring
- Skin tone improvement
- Increased blood circulation

Additional procedures such as Ultherapy, Fraxel, or Instalift can also be incorporated to help with secondary issues of weight loss (i.e. stretch marks, saggy skin).
