

SOFT TISSUE MASS ULTRASOUND

OVERVIEW: For this test, the sonographer examines the direct area of concern. This area may be something you, or you and your doctor, feel or just an area of pain.

PREPARATION: There is no special preparation required for this exam.

This test can rule out and diagnose a number of problems such as (not limited to):

- Identify the internal structure of the soft tissue mass...i.e. solid versus cystic
- Attain true measurements of the mass
- Determine if the mass has blood flow
- Determine if the mass is a hernia

The reason for the test will depend on your symptoms.

THIS ULTRASOUND WILL TAKE ABOUT 10- 20 MINUTES AND THE REPORT WILL BE BACK TO YOUR ORDERING PHYSICIAN WITHIN 24-48 HOURS.
