

Patient Portal News

We support our patients having access to their health information through our Patient Portal.

Beyond our Patient Portal, we can enable certain mobile apps that meet requisite technical specification and security requirements to provide you access to your health information in a safe and secure way.

Currently no mobile apps have been configured to connect to our system.

Our website, **www.slhv.com**, will be updated if any additional apps become available for you to use to access your health information. Please check the site regularly for updates.
