Refraction Service & Contact Lens Fees

A refraction is the procedure in which we determine the best corrected visual acuity of each eye for purposes of medical evaluation and/ or for ***prescribing glasses, contact lenses or prior to surgery.***

It is **NOT** a service covered by Medicare or most medical plans, as they consider the service to be "vision" service not a "medical" service.

Our fee for a refraction is **\$75.00** and is payable at the time of service. This fee is in addition to any co-payment or deductible that your plan requires.

If you wear contact lenses and would like your prescription renewed, or a new contact lens fitting, the fee is **\$130** (which includes basic refraction and a **\$55 fee** for contact lens fitting)

Patient Acknowledgement

I have read the above information and understand that the refraction and contact lens renewal are services that are not covered by insurance. I accept full responsibility for the cost of this/these service(s), and I understand that payment is due at the time of service. I understand that any copayment, coinsurance, or deductible I may have are separate from and does not include these fees.

***If you agree to these charges and would like a new prescription please print and sign below:**
