Pain Management Regimen: Advil, Motrin, Acetaminophen

Please take 800mg of Advil and 1000mg of Acetaminophen 2 hours prior to your dental procedure. Take 800mg of Advil or Motrin first and wait an hour before taking 1000mg of Acetaminophen. Then 6 hours after the first dose you will repeat the regimen; however you will reduce the strength. You will only take 400mg of Advil or Motrin. Wait 30 minutes and take 500mg of Acetaminophen. You will continue with the reduced dosage every 6 hours for 3-4 days after your procedure. If you have any questions or concerns, please contact our office.
