The biggest festivities of the year are fast approaching. We are all getting busy in shopping for gifts and planning get-togethers. Gifts are a great way of showing love and care. How about a personalized gift of wellness for your family members with the **Nexclin Gift Cards!** Here, we're announcing our biggest discounts of the year.

Nexclin Liquid Facelift

A liquid facelift involves strategically injecting dermal fillers into the skin to provide contours and plumpness to the face. It differs from a surgical facelift in that it doesn't involve cutting into the skin. The goal of a liquid facelift is to provide naturally lifted, fresh look. It can diminish the hollow areas under your eyes, fill your cheeks if they look gaunt, tighten wrinkles

around your lips, eyes, and forehead and reduce the appearance of scars. We generally advise treatment of the entire face rather than one area for naturally youthful results.

Promotion: Facelift - Buy two syringes of Voluma for \$1300 (\$400 savings) or Buy 3 syringes of Voluma for \$1800 (\$750 savings) and get lash burlesque free.

Lip Filler - 1ml syringe of Juvederm \$495 (\$180 savings)

Buy one vial of Kybella for \$500 and get the second vial half off (\$250 savings)

Nexclin Botox treatment

Dr. Cheema uses BOTOX® for a variety of cosmetic treatments. Botox is considered by many in the field of cosmetic medicine to be a "wonder drug." BOTOX® relaxes the muscle being targeted and prevents its activity. This helps to slow the formation of fine lines and wrinkles. The procedure is quick taking no more than 15

Forehead Lines:
20-30 units

Crow's Feet:
12-16 units (per side)

Perioral Area: 4-10 units

Dimpled Chin: 2-8 units

Botox Brow Lift:
4+ units (per side)

Frown Lines: 30-40 units

minutes and there no downtime. The effects develop within three to five days and usually last from three to six months.

Promotion: Botox \$10/unit (minimum 30 units)

Nexclin PDO Thread lift

Nexclin Thread Lift is a non-surgical procedure wherein temporary sutures are used to produce a subtle but visible "lift" in the skin. This has the effect of pulling the skin back slightly and therefore lifting and tightening the face and neck. In addition to being ideal for lifting the skin, threads also combat the aging process by provoking the body's "healing response" and causing the body to direct large surges of collagen to the treated areas. This is important because of the vital role collagen plays in the aging process.

Promotion: Full Face and Neck Lift for \$3500 (\$3000 savings)

Nexclin Testosterone Replacement Therapy

As we age, hormone levels will decline. The symptoms of andropause in men are fatigue, depression, irritability, decreased memory, reduced libido, erectile dysfunction, insomnia, and osteoporosis. Hormone Replacement Therapy is the replacement of hormones in men with andropause in the form of injections, gels, patches or pellets. We recommend blood testing to get a baseline on your hormone levels and then suggest a customized treatment plan to make you feel more balanced.

Promotion: Schedule a hormone consultation today and get a complimentary Vitamin B12 injection.

Nexclin PRP for Hair Loss

PRP (platelet-rich plasma) therapy has been in use since the 1980s for problems such

as healing injured tendons, ligaments, and muscles. Now we are seeing great results for the treatment of hair loss. PRP therapy for hair loss is a three-step medical treatment in which a person's blood is drawn, processed, and then injected into the scalp. PRP injections trigger natural hair growth and maintain it by increasing blood supply to the hair follicle and increasing the thickness of the hair shaft. We highly recommend using laser helmets at home with the in-office PRP treatments.

Promotion: Get a session of PRP hair loss treatment for \$800 and get the second session half off (\$400 savings)

Nexclin Acne Treatments

Acne is a skin condition that occurs when your hair follicles become plugged with oil and dead skin cells. Acne is most common among teenagers, though it affects people of all ages. There are plenty of treatment options at every price point. A gentle, targeted approach always works better than too-harsh products that strip the skin of its moisture. A cortisone injection will reduce inflammation and shrink swelling within six to 48 hours. We also recommend light therapy to target bacteria within the pores. Some oral antibiotics like tetracycline are also anti-inflammatory, which helps improve acne. Prescription vitamin A derivatives like Accutane may also be suggested.

Promotion: Buy 12 month Acne membership for \$100/month and get one additional month free (\$100 savings)

Testimonial

"Everyone that works at Nexclin Medicine is very passionate about their patients and providing the best care possible. Since my very first call to Linda to schedule my initial visit I've received nothing but love and encouragement. Special thanks to Linda for making me her project and getting me through a very difficult time with her unwavering support. Overall great experience." Verified Patient
