## Your Guide to Growing with Nutrafol.

Welcome, and thank you for choosing to partner with Nutrafol. Below you'll find an overview of frequently asked questions, and some helpful ways to talk about Nutrafol.

### What should your clients expect?

Let's start with the basics: everyone's hair health is different. But with commitment, your clients can measure their success with signifiers like better texture, shine, less shedding, increased growth rate, plus thicker, healthier hair.

### When should changes become noticeable?

Growth is a process, not an event. Commitment is key to success. By taking Nutrafol daily for 6 months, here's a snapshot of what users are likely to experience:

**Month 1-3:** Set the stage for growth. The botanicals and supportive nutrients are working to balance the bodily system and target the factors affecting hair health.

**Month 3-6:** Start seeing healthy hair growth.

**Month 7+:** Stay committed. Stay growing.

### Is Nutrafol safe for everyone?

The short answer? Yes. We suggest Nutrafol for everyone looking to improve their hair health naturally. However, we **do not** suggest Nutrafol for anyone who is pregnant, nursing, or looking to conceive. Additionally, we always suggest reviewing any medications with a primary-care physician before taking Nutrafol.

# NUTRAFOL

## What percentage of users see results?

In a clinical study on our Women's Core formula, 80% saw increased hair thickness, 76% noticed new hair growth, and 80% experienced improved hair growth. Though judging by the number of testimonials we've received, users everywhere are seeing a healthier hair line!

## Promotion Guidelines

We have established a minimum advertised policy for all advertisements in social media, print, tv, etc. This requires no advertising of discounts higher than 20%.
