CORONAVIRUS (COV-19)

Dear Valued Patient:

News and warnings about Coronavirus (COV-19) are all around us. We understand that many of you may be anxious about what it may mean for your dental health care visits. Our landlords here at the 450 Sutter Building are also taking added measures to keep us and you safe. Among other things, they have taken the step of hiring an additional custodian whose only job is to keep common area spaces clean and disinfected. We are following recommended precautions and in coordination with the American Dental Association making sure that we stay abreast of any additional oral health-related precautions. Rest assured, we are staying on top of this rapidly evolving situation, we want to provide you with some trusted resources to find the most up to date information. We recommend that you check in with these resources from time to time for updates.

Reduce the Spread of Germs

1. Wash your hands with soap and water frequently, for at least 20 seconds (about the time it takes to sing the happy birthday song twice).
2. Use tissue to wipe nose and face.
3. Avoid touching your face
