

**Do you have questions about the Coronavirus?  
Should I keep my scheduled doctor appointments?**

At Dilworth Dermatology and Laser, we are asking our patients and visitors to join us in our “we” approach to limit the spread of Coronavirus.

Here’s what the “we” approach means to us.

**This is what you can do.**

Wash your hands frequently using soap and water for 20 seconds.

Avoid touching your face.

Try to stay 3 to 6 feet away from others.

Do not attend gatherings or events where people will be close.

If you or anyone in your household are not feeling well we kindly ask that you call (704-376-9849) and reschedule your appointment with us.

If you have recently traveled to any Coronavirus hot zone, we ask that you call and reschedule your appointment.

We look forward to seeing you, whenever that may be!

**This is what we are doing.**

We have already increased the frequency of sanitizing our clinic.

We use medical facility grade products to disinfect surfaces, door handles, furniture, bathroom surfaces, sink handles, computer keypads, telephones, credit card terminals, and much more.

We have increased the frequency of **20 second hand washing. Hand washing for 20 seconds with soap and water is preferred when available.** We have hand sanitizer available throughout our clinic.

**None** of our staff have traveled to Coronavirus hot zones and no staff members have reported any signs of illness. Should any staff member show signs of illness, they will not report to work, but may work from home if able.
