

PREMIER

WOMEN'S HEALTHTM

Thank you for being a part of the Premier Women's Healthy family.

We are here at the office and committed to continue to serve you during this unprecedented medical pandemic.

Coronavirus (Covid 19) infection prevention is a top priority and recommendations are rapidly evolving. We are continuing to monitor all updates, recommendations and guidelines from our local and state government agencies, Centers for Disease Control (CDC) and The American College of Obstetricians and Gynecologists (ACOG). Please be assured that our preparedness also includes office sanitization and employee health protection.

However, we will need your help as well. For us all to decrease the spread of Covid 19 we will be implementing the following measures:

- If you have any signs or symptoms of infection we ask that you **DO NOT COME** into the office but **CALL** us to report:
 - o Temperature of 100.4 or higher or in patients over age 65 temperature >99.6
 - o Cough
 - o Sore throat
 - o Difficulty breathing or shortness of breath
 - o Gastrointestinal symptoms
- **DO NOT COME** into the office if you have:
 - o Traveled to countries or cruises significantly impacted by Covid19 within the last 14-21 days (see CDC.gov website for regular updates)
 - o Been in contact with anyone diagnosed with Covid19
 - o You are caring for a sick family member
- We will need to **limit any accompanying visitors to ONLY ONE per person**. If you do not need to bring anyone with you that is preferred.
- We do NOT have Coronavirus testing at our office. This testing right now is done through ER services, your primary care provider or the county health department.
- Please remember to check in with us at the office. While we are continuing appointment reminder calls a week prior to your appointment, please remember we need for you to call 24 hours prior to your scheduled appointment to avoid any cancellations fees.

Together we can weather this storm. Please stay healthy and continue to follow your own safe practices such as: regular hand washing, use of hand sanitizer, avoid touching your face, cover your cough and sneeze, regularly disinfect hard surfaces in the home, avoid gatherings of more than 10 people if possible. Please stay at home if you are sick.

As always, we thank you for being a loyal patient. While we all closely monitor the Coronavirus situation, let's continue to work together as a community of patients, providers and staff to follow recommended guidelines in order to remain healthy. We are here to provide any support you need.

Carolyn Kollar, DO, FACOOG, Magen Hutchins, WNHP, Candice Conley, Practice/Office Manager, Brenda, MA, Detra, MA, Sandra, Megan and Gaby.
