

*A Message from Dr. Ragen
Ventura Eye Institute, Inc.*

Dear Patient,

The past several weeks have been a challenging time for all Americans, but we at the Ventura Eye Institute are committed to providing you with the very highest quality of care and to keeping you safe.

We have taken tremendous steps to assure your safety if you need to come into our office by implementing medical-grade air exchangers/purifiers; sophisticated surgical masks for all staff and one-patient-at a time scheduling.

We're committed to promoting social distancing during this time as well, so we've implemented **video/audio Telemedicine visits** for all our patients. Some of the things that can be diagnosed/discussed during a Telemedicine are infections of the eye, cataract symptoms, retinal detachment symptoms, glaucoma symptoms, double vision symptoms and causes, headache issues, vitreous floaters, drooping eyelids and eyelid surgery evaluations.

If you would like to schedule an appointment just call the office.

Call Us Today!
(805) 643-EYES (3937)

In addition, you may reach through our email at VEIurgent@gmail.com. We look forward to providing continuous care for your eyes.

Dr. Ragen, Brianne Enegren, PA-C, Dr. Huynh
