

ALLIED HEALTH SOLUTIONS IPA

Newsletter

A Primary Care Provider Group

Thank you for being a member of Allied Health Solutions IPA. The IPA was formed with our members needs as our core foundational value. Our mission is to close the gap to access to quality care in our community by providing access to Specialists and services that are familiar with medical and social needs of our community

AHS IPA will expand on the services of the modern-day equivalent of old fashioned house calls with regularly scheduled visits that are designed to meet the specific needs of patients, whether they are seniors or other age groups. Our service also includes transportation to and from our clinic. We can even arrange transportation, to the hospital for admission or to visit a Specialist. AHS IPA Field Intervention Nurse is available to provide In-Home nurse visits at your convenience. Together, these services constitute a “Medical Home” approach, focused on patient-centered accessibility to health services that are delivered with competence and compassion.

It goes without saying that we are all facing unprecedented times in the face of the current COVID-19 epidemic. Allied Health Solutions is an essential component of the U.S. Healthcare system and we remain open to support needs of our members. While we continue to work tirelessly to provide you the service you have come to expect of us, we are committed to the health, safety and well-being of our employees – without them, we could not provide our services to you. Until further notice, we will be providing Telehealth services at the time of your scheduled appointment. Please take time to visit our website www.alliedhealthsolutions.com, for useful resources. Enclosed are free mask and gloves to be used for your personal protection.

As we all work to navigate these uncertain times, know that our motto still stands – Allied Health Solutions, **Your Medical Home**. We are here for you and with you. We are grateful for the opportunity to have served you, to serve you now, and to serve you in the future.

The Department of the Treasury (Treasury) announced on April 1, 2020 that Social Security beneficiaries who are not typically required to file tax returns will not need to file an abbreviated tax return to receive an economic impact payment. The IRS will use the information on the Form SSA-1099 to generate \$1,200 economic impact payments to Social Security beneficiaries who did not file tax returns in 2018 or 2019.
