## **CORD BLOOD COLLECTION SERVICES**

Dear Patient:

We are happy to provide Cord Blood collection services for our patients. However, because cord blood banking is an elective procedure, some insurance companies may not cover this.

The cost for this procedure is \$350 per baby. We request that you make payment for this service by your 36<sup>th</sup> week of pregnancy. We will bill your insurance for the collection and you will not be held responsible for more than \$350 per baby.

Your insurance may request CPT and ICD-9 codes for this procedure. Codes that have been recommended by various coding sources are as follows:

CPT Codes:

S2140  
59899  
36410

ICD-9 Codes:

V59.02

You might be eligible for reimbursement in part or full from the Cord Bank that you have chosen. You will need to contact your Bank for reimbursement information.

We urge you to check with your insurance company and the Cord Bank on your reimbursement before deciding to go forward with this procedure to make an informed decision based upon your personal situation.
