

iWellness Exam

We are excited to let you know that during today's visit to Family Eyecare you will experience the benefits of the latest advancement in eye health care – the iWellnessExam™. iWellness exam is quick (5 seconds), non-invasive (no bright lights or eye drops) scan that allows us to see beneath the surface of your retina and detect vision threatening, and systemic diseases in their very early stages, when they are most treatable.

Many eye problems can develop without warning and progress without symptoms. In the early stages, you may not even notice a change in your vision. But sight threatening conditions and diseases such as macular degeneration, glaucoma, diabetic retinopathy and others can be detected with a thorough evaluation of the retina, including the iWellness Exam.

The iWellnessExam is a fast, simple procedure that can help your doctor detect common eye diseases:

- Diabetic Retinopathy (damage to the blood vessels in retina caused by diabetes)
- Glaucoma (nerve fibers suffer damage and progress to blindness if untreated)
- Macular Degeneration (damage to the center of the retina that makes it difficult to see fine details)

iWellnessExam is considered a preventative test and is not covered by vision or medical insurance. The cost of the test is \$39. Please check the box below if you would like to have the test completed today.

Yes, I would like to do the iWellness exam today
