Non-Operative Proximal Humerus Fracture Rehab Protocol

This protocol provides the physical therapist with general guidelines for initial stage and progression of rehabilitation according to specified time frames, related tissue tolerance and directional preference of movement. Specific changes in the program will be made by the physician as appropriate for the individual patient.

PHASE I (1-3 WEEKS) DATES:

Appointments	No PT for 3 weeks, unless otherwise specified by MD
Rehabilitation Goals	<ul style="list-style-type: none"> • Modalities to control pain and swelling • Protect fracture site • Maintain ROM in surrounding joints • Prevent deconditioning
Precautions	<ul style="list-style-type: none"> • ROM and WB'ing limitations per MD • Sling at all times x 3 weeks (or per MD) • No cuff strengthening
Suggested Therapeutic Exercises	<ul style="list-style-type: none"> • AROM cervical, elbow, wrist and hand • Scapular clocks, shrugs, pinches, PNF
Cardiovascular Exercises	<ul style="list-style-type: none"> • Bike in sling, walking on treadmill in sling
Progression Criteria	<ul style="list-style-type: none"> • X-ray evidence of healing • Clearance from MD to begin PT

PHASE II (3-6 WEEKS) DATES:

Appointments	<ul style="list-style-type: none"> • Begin physical therapy at 3 weeks post injury if cleared by MD • Physical therapy 1-2 x/week
Rehabilitation Goals	<ul style="list-style-type: none"> • Regain full ROM • Restore GH and scapula-thoracic rhythm • Minimize deconditioning • Modalities to control pain and swelling

OrthoTeam Clinic
