

in addition to wipe-down, sanitization after each patient.

- **Among the First to Use and Produce Our Own Ozone Water** for use in our treatment room water systems. Ozone water is anti-viral, providing an additional layer of protection in the water used during exams and treatment to our centers' anti-COVID rinse.

- **Negative Pressure, Hospital-Grade Aerosol Suction Units** deployed during all procedures where

water is used. Our units collect 99 percent of the aerosol generated, providing added protection from infection from any aerosols or airborne water droplets.

- **Upon checkout, No-Touch Credit Card Scanners and a UV Wand** are available, providing another layer of assurance that no germs will leave with the patient.

- **No Touch Espresso To Go** made by masked, gloved team members wearing face shields upon request.

Negative pressure, hospital-grade, extra oral suction units, utilized with our in house-produced Ozone Water, minimize the risk of aerosol contamination during hygiene and all procedures.

Our team is empowered to use UVC Ozone wands to scan our patients at check in, during, and upon departure of small items such as masks, credit cards and pens for disinfection.

Our check-in station includes Touchless Temp Scan, Anti Covid Rinse, UVC Wand and box for keys, iphone, eyeglasses, and Covid "Rapid-Test" is available, and required for surgical patients.

Dr JP Pechak, under the BLUE. We utilize UVC Ozone units for whole room disinfection placed in each in each operatory.

Our whole room UVC Ozone at work, 12 minutes to total disinfection.

Dr JP with Dr Kanika Bembey, our board-certified associate Periodontist.

Dr Pechak is a board certified Periodontist embracing the evolution of better options with a focus on minimally-invasive techniques for gum disease, oral surgery, dental implants, and implant-supported dentures. As a CE provider for the State of California, he lectures and hosts educational events for Dentists, dental teams and the community of Dental Hygienists. He is the Founder and Director of a chapter of the Seattle Study Club network, as well as our Hygiene Study Club. Please contact us if you wish to be a part of our continuing education series, in which CEU's are earned.

PerioDontaLetter

Jochen P. Pechak, DDS, MSD, *Periodontics, Implant & Laser Dentistry*

Dear Colleagues and Appreciated Referring Doctors,

We are ready to take on the COVID-19 challenge with major upgrades to our equipment and protocols from check-in to completed surgical treatment.

As a highly-trained surgical team, we are always conscious of maintaining a very high standard of infection control.

We have always taken great pride in providing a safe, surgically clean environment.

Now, we are excited to present to you our new, hospital-grade, COVID-19 SAFE equipment and procedures to ensure the additional safety of our patients and our team.

With these upgrades, we will continue to provide and maintain the surgical 'Gold' standard of care we have always set for ourselves in our ongoing fight against all infectious diseases, in particular the COVID-19 pandemic.

KEEPING YOUR PRACTICE AFLOAT In a Sea of Water Droplets My Journey of Practice Survival

To raise the bar to today's standards, our doctor has invested in the following new, hospital-grade equipment, and implemented additional COVID-safe protocols and policies to maintain our surgical gold standard of care.

- **One-on-one Screening of Patients at Check-in**, prior to entrance into the office, including a no-touch temperature scan and a UV bar scan to kill any viruses on the surface of clothes, keys and wallets. Patients will be given an anti-COVID rinse, a complimentary, personalized mask, UV-Safe phone sanitizers, traditional hand sanitizers and wipes, and a standard, plexiglass sneeze shield.

- **Scheduling according to social distancing protocols.**

- **COVID Testing for Surgical Patients** on the day of treatment by RapidTEST, which provides results in ten minutes for the antibodies of COVID-19, and exposure.

- **Sneeze Guard Plexiglass Barriers** at our front desk, along with protective equipment for our team, including face shields, masks and gloves. Our Team checks in for our workday with the same protocols we use for our patients.

- **A Socially Distanced Reception Area** with complimentary UV sanitizer drop box for cell phones and keys to use while seated. Each wipe-down will be recorded by the team on a flip chart visible to patients.

- **Air Purification Systems** by Surgically Clean Air, a leader in hospital grade air filtration for emergency rooms. These medical-grade air filters provide our patients with constant, fresh, clean, germ-free air in every room at a rate of more than three times necessary for our space, ensuring any airborne viruses and bacteria are immediately and consistently eliminated.

- **UVC BLUE Ozone Light Whole Room Disinfection** after each patient,

Jochen P. Pechak, DDS, MSD
