and Rehabilitation

AREAS OF EXPERTISE

Non-surgical and regenerative treatments for all joint and muscle
conditions: back, neck, shoulder, elbow, wrist, hip, knee and
ankle. Stem cell therapy, platelet-rich plasma, joint fluid therapy,
individualized rehabilitation, and pain management.

3 THINGS YOU NEED TO KNOW

Joint or muscle pain doesn't have to mean surgery. Surgery and a long recovery are not your only options. From proven conservative treatments that help patients achieve peak performance, to the most advanced regenerative treatments, Dr. Rahimi has an arsenal of ways to control pain and keep you active.

Truly individualized care.

From diagnosis to treatment, every step is tailored to your needs and your body. Dr. Rahimi believes the best outcomes come from people who care. People who treat you like a person, not a patient.

Proven outcomes.

Of the many patients she treats every year for joint fluid therapy and rehabilitation, over 90% experience significant improvement.

"Health care can and should be better - more personal, more understanding, more convenient, more caring. We're changing health care, and it starts with non-invasive and regenerative solutions." - Maryam Rahimi, D.O.
