

Dear Provider

We would like to thank you for referring your patients to us here at Intermountain Spine & Orthopaedics (ISO). We appreciate the opportunity to care for your patients. Our office staff prides themselves in providing the best comprehensive orthopaedic care possible. We have satellite offices in both Gooding and Burley for ease and convenience of the patients in those and the surrounding areas. We are currently seeing patients in the Gooding clinic at least twice monthly. We are also looking to increase access to care in Burley from once to twice monthly.

Recent changes in insurance approvals for surgery have caused some patients atypical/unexpected delays in treatment as further conservative approaches are tried. To assist us in providing timely care to your patients, we would ask that the following information be included upon referral:

Demographics sheet & copies of insurance cards & ID, Healthy Connection or referral request to insurance

***Injection and operative reports***

Complete list of prescribed medications and the duration of usage

Past or present physical therapy progress notes

Imaging Reports

Any supplemental doctor's notes

Medical, Surgical, Family, & Social Histories

We appreciate your trust and confidence as you choose to continue to refer to your patients to Intermountain Spine & Orthopaedics.

Respectfully,

David M. Christensen, M.D. and ISO staff
