2 GWYNETH'S COMPLEXION DOT Therapy

Cost: \$2,500 per treatment
Recovery time: 3-4 days
The newest approach in skin rejuvenation is DOT Therapy (Dermal Optical Thermolysis). It creates thousands of microscopic perforations which help with skin tightening. "The laser energy creates heat, and that dot of heat shrinks the collagen," explains Dr. Carolyn Jacob, director of Chicago Cosmetic Surgery

and Dermatology. "By shrinking the collagen, the result is fewer wrinkles." Skin peels off in little, sandpaper-like flakes and requires only a cold compress, moisturizer and SPF after.
