

## WHAT YOU NEED TO KNOW ABOUT KÖR WHITENING...

### ❖ Why does KÖR Whitening work so well?

The KÖR Whitening System works by restoring your teeth's ability to absorb oxygen. The oxygen from KÖR Whitening gel is absorbed deeply into the tooth, dissolving stain molecules.

### ❖ How long does KÖR Whitening last?

Unlike other whitening methods, with easy periodic home maintenance, KÖR Whitening is entirely permanent.

### ❖ Is it safe?

Whitening products have been clinically studied and safely used on millions of patients without harm to teeth or gums. KÖR Whitening is considered entirely safe. And KÖR Whitening gels are gluten free.

### ❖ Is there pain or discomfort with KÖR Whitening?

After several years of research, development and clinical testing, KÖR Whitening introduced a whitening gel that, in most cases, produces little to no sensitivity. Since KÖR whitening gels are continuously refrigerated from the time they are manufactured until your dentist receives them, they contain no chemical stabilizers that can cause discomfort during whitening.

### ❖ Does it matter how old I am?

The ideal age to whiten teeth is about 14. The younger teeth are, the more brilliantly they whiten. However, KÖR Whitening rejuvenates even older teeth so that they will whiten incredibly well, even for patients 90 years old!

### ❖ How white will my teeth get?

KÖR Whitening whitens teeth dramatically, often lightening them 16 shades or more. Although everyone is different, with the proper KÖR Whitening System, you'll enjoy the best results possible. KÖR even whitens tetracycline-stained teeth.

### ❖ Will my teeth look too white and unnatural?

No. Real teeth can't look unnatural, they just look beautifully white. If you have seen people with ultra-white, fake-looking teeth, these were probably false teeth, teeth with porcelain crowns, or veneers that may have been made too white and too opaque. With KÖR Whitening, you'll get the ideal shade that's right for you.

ADD "WOW" TO YOUR SMILE WITH

### ❖ Will my crowns, veneers or fillings whiten too?

No. If you have any of these on your front teeth, you may need to replace some of them after whitening.

### ❖ How will coffee, tea, smoking and red wine affect my teeth after whitening?

With easy, periodic home maintenance, these staining foods will have little or no effect on the brilliant color of your teeth.

### ❖ How does the KÖR Whitening System work?

Molds of your teeth will be made to fabricate your own unique, ultra-comfortable KÖR-Seal™ Whitening Trays. You and your dentist will select the KÖR Whitening System that is the proper fit for you. You will normally wear your KÖR-Seal Trays at home for two weeks while you sleep. Depending on the whitening system you select, you may also have one or two simple whitening visits in the dental office.

### ❖ Will the whitening trays be uncomfortable, difficult to sleep with or will the whitening gel leak out of the trays?

No. KÖR-Seal™ Whitening Trays are very different from typical whitening trays.

- **They're comfortable:** because they're thin and ultra form-fitting, you'll forget they're even in your mouth.
- **They're convenient:** by wearing these only while you sleep, it doesn't interfere with your busy day.
- **They're secure:** KÖR-Seal Whitening Trays seal the whitening gel inside the tray, preventing the gel from leaking into your mouth.

## LOVE YOUR SMILE

The KÖR Whitening System was invented by internationally renowned cosmetic dentist and whitening science expert, Dr. Rod Kurthy. Thousands of dentists around the world agree that KÖR Whitening is by far the most reliable and effective whitening system ever developed. In fact, the KÖR Whitening System is so effective, it is the only recognized whitening system that whitens even tetracycline-stained teeth in a short time (previously thought to be impossible). **And these amazing KÖR Whitening results are achieved with minimal to no sensitivity!**
