Morris Medical Weight Loss Program

Dear Patient,

We would like to welcome you to Morris Medical Center. Our medically supervised program will provide you with the foundation to accomplish your weight loss goals quickly and safely.

Your program begins with a consultation with Dr. Morris. During this time you will be instructed on a custom nutritional plan which is proven to lower your blood insulin level. This process increases the body's ability to burn fat, and creates the foundation of maintaining your weight loss. A blood panel may be done to check your metabolism and your weight measurement will be performed. You will also be advised on a specific exercise regimen, which is a very important component to a successful weight loss program.

Dr. Morris will then evaluate your medical and weight history, and make the appropriate recommendations for your individualized program. You may be prescribed and dispensed a Food and Drug Administration (FDA) approved appetite suppressant, which has been proven to be safe and effective for many years. Our program also utilizes weekly supplementary injections that will enhance your desired weight loss outcome.

Our program requires weekly scheduled visits to assess your progress, dispense your medication, and make any indicated changes. We take great pride in our program, and thank you for your interest.

Kind Regards,

Dr. Morris and Staff

Morris Medical Weight Loss Program

Appetite Suppressant and Weight Loss Consent

I hereby authorize Morris Medical Weight Loss Program and associates to assist me in weight reduction. I understand that my program may consist of a balanced calorie deficient diet, regular exercise program, and lifestyle changes. I also understand that appetite suppressants, other medications, and injections may be used.

Injections, nutritional supplements and medications can help you lose weight faster and make you feel better while you are losing weight. These nutritional supplements, injections and medications can boost your energy, burn fat faster, and eliminate cravings. If you have any problems or questions, please inform one of our medical associates immediately.

I understand there are other ways and programs that can assist me in my desire to decrease my body weight and to maintain this weight loss. In particular, a balanced calorie counting or an exchange-eating program without the use of the appetite suppressants would likely prove successful if followed, even though I would probably be hungrier without the suppressants.

I understand that there are risks associated with obesity. Among these risks are tendencies to high blood pressure, diabetes, and heart attack, and heart disease, arthritis of the joints, hips, knees, and feet. I also understand that thirty to forty percent of overweight or obese patients may have or develop gallstones. A large percent of this group will develop significant gallbladder disease during their lifetime. I also understand that rapid weight loss programs may increase the incidence of symptomatic gallbladder disease.

I understand that if you develop side effects from the diet or the medication, I will discontinue the diet and/or the medication and notify a member of your medical staff immediately. I also understand that if the problem is severe, I will go to the nearest Emergency room or see my primary care physician as soon as possible.

There is no guarantee that the program will work for me. By consenting to treatment I agree to pay in full for all visits and charges at the time of each visit. I understand that your services are not reimbursed by insurance, and that you do not provide or fill out claim forms for insurance purposes. I understand that no refunds are ever given at any time for any reason. I also understand that the medications dispensed to me during my weekly visits are included for the quality assurance and my convenience; however, I may request that a prescription be written for the weekly dose of the medication.

By signing below I certify that I have read and fully understand this consent form. I should not sign this form if I have any questions or concerns that have not been answered to my complete satisfaction. My signature further confines that I do not have a history of alcohol abuse, drug abuse, schizophrenia, manic-depressive illness, or history of any eating disorder, since these conditions constitute a contradiction to the use of appetite suppressants. I agree not to take any other appetite suppressants, other medications or injections other than those prescribed by Morris Medical Weight Loss Program or Dr. Morris, or listed on my medical history form. I agree to inform a member of your medical staff of any changes in my medications.

If female, my signature confirms that I am not pregnant, do not plan to get pregnant, and I will take all necessary precautions to prevent pregnancy during the time I will be taking the appetite suppressants. If I become pregnant, I will stop the medication immediately and notify your office.

I further understand that Morris Medical Weight Loss Program and all written materials describing your program or any of its parts, and all applicable trademarks, copyrights and other intellectual property in or to your program and related materials are and remain your absolute property. I acknowledge that I am purchasing a non-exclusive, non-transferable license to use your program and the related written materials for my own use, and that I have no right to duplicate or to sell, lend or otherwise transfer to any other person or to make any commercial use of program or related written materials. I may not modify, publish, distribute, perform, participate in the transfer or sale, create derivative work of, or in any way exploit any of the content, in whole or part.

My signature below indicates my consent of treatment.
