

BPC 157

BPC is used to prevent gastric ulcers, improve digestive function, protect and heal inflamed intestinal epithelium (leaky gut), eosinophilic esophagitis, help inflammatory bowel disease and protect the liver from toxic insults.

The body naturally produces BPC in the GI tract. Having multiple benefits, BPC works outside the pituitary gland.

Benefits of BPC 157 Include:

- Potent anti-inflammatory
- Possesses neuro-protective properties—specifically modulating the serotonergic and dopaminergic systems
- Promotes angiogenesis and vasculogenesis
- Maintains GI mucosal integrity
- Protects and prevents gastric ulcers
- Improves digestive function (IBS)
- Used in Inflammatory bowel disease (IBD) exacerbations/flare
- Protects liver from toxic insults (alcohol, antibiotics, etc) and promotes healing
- Repairs tissue; such as GIT, tendons, ligaments, brain, bone, etc
- Effective treatment for Traumatic brain injury (TBI)
- Protects and heals inflamed intestinal epithelium (Leaky Gut Syndrome)

The Specific Target Conditions of BPC 157 Include:

- Lyme disease
- Chronic viral or intracellular infections
- CFS/Fibromyalgia
- Autoimmune disease
- Inflammatory conditions
- CVD
- Post-surgical
- Diabetes
- Aging
- Allergies
- Chemical sensitivity
- GI ulcers/inflammation
- Inflammatory bowel disease
- Leaky Gut Syndrome
- H-pylori
- Prevent/treat heart arrhythmias
