# THE HOUSTON SPINE & REHABILITATION CENTERS

## And Houston Spine & Rehabilitation Affiliates

### TO: PATIENTS OF THE HOUSTON SPINE & REHABILITATION CENTERS AND HOUSTON SPINE AND REHABILITATION AFFILIATES

The Houston Spine & Rehabilitation Centers and Houston Spine and Rehabilitation Affiliates specialize in the treatment of the spine and associated pain. We perform various treatments consisting of passive modalities, therapeutic interventions and spinal manipulation. The goal of our services is to reduce and/or eliminate your pain, however, with any chiropractic and/or physical medicine services there are risks associated with the services we provide.

As your healthcare provider, we feel that it is crucial that you understand these risks. By informing you of these risks, we are striving to more actively involve you in our care, as well as further assist you in making well informed decisions regarding your treatment options.

#### PASSIVE MODALITIES

Passive modalities consist of the following treatments: hot packs, cold packs, ultrasound, electrical stimulation, massage, traction and cold laser. The primary risk associated with passive modalities is skin irritation due to exposure to heat, cold or agents used in application or modalities (i.e. lotions and pads). If you have experienced skin sensitivity to heat, cold temperatures and/or lotions or similar products in the past, or are aware of any skin allergies, please inform our staff prior to treatment so proper precautions can be made prior to initiating treatment.

#### THERAPEUTIC INTERVENTIONS

Therapeutic interventions consist of the following types of treatments: stretching, flexibility exercises, strengthening exercises, joint mobilizations and myofascial release. Therapeutic interventions are generally quite safe, though there are risks associated with each of these procedures. The primary risk is potential aggravation of your current condition and/or underlying condition. As with any physical activity and/or exercise, there is also the risk of injury. Though this risk is minimal, as you are under the direct supervision of experienced clinical staff, it may still exist. Some responses to therapeutic interventions are muscle soreness, muscle fatigue, increased discomfort, overall tiredness and/or joint stiffness and/or pain. It is important that you inform your treating staff member of any of these responses following your treatment and more importantly, it is crucial that you continue to attend your appointments as scheduled so your condition can be documented and your symptoms effectively managed.

#### SPINAL MANIPULATION

Spinal Manipulation consists of adjustments that seek to restore normal function to the spine and other joints. Typically, this involved applying a specific, highly controlled treatment directly to a joint or muscle. This treatment often reduces or eliminates both local and referred pain, allows muscle spasms to relax and may even release the Irritation from the nervous system, which may result in other health benefits. As with any healthcare service, there are potential reactions and risks, however as with any healthcare intervention, it is hoped that the expected benefits of spinal manipulation exceed the expected risks. These are unavoidable risks of spinal manipulation which, though rare, can occur.

#### DISK HERNIATION

The occurrence of disk herniation during spinal manipulation is highly unlikely. In fact, averaged disks withstand an average of 23 degrees of rotation and degenerated disks an average of 14 degrees of rotation before failure occurs. Furthermore, given the fact that during manipulation posterior facet joints limit rotation to a maximum of 23 degrees, this joint would have to fracture to allow any further rotation to occur.

#### CAUDA EQUINA SYNDROME

It is estimated that the rate of occurrence of the Cauda Equina Syndrome as a complication of lumbar spinal manipulation is about one case per 100 million manipulations. It is probably higher in patients with a herniated nucleus pulposus and lower in patients without this anatomic abnormality.

#### VERTEBROBASILAR ARTERY COMPROMISE

Serious complications of cervical spine manipulation are also rare (none have been reported in any of the clinical trials) but appear to be more common and severe than complication of lumbar manipulation. The most serious complication of the cervical spine manipulation is related to compromise of the vertebralbasilar artery, leading to stroke or death. The risk is higher for manipulation involving rotation plus extension of the vertical spine than for other types of manipulation and those persons who have suffered manipulation related vertebralbasilar artery compromise due to atherosclerotic disease. The best estimate of the incidence of vertebralbasilar artery compromise related to cervical spine manipulation is that it occurs one in a million manipulations (Hurwitz, 1996; McGregor, 1955).

#### PATIENT UNDERSTANDING AND ACCEPTANCE OF RISKS ASSOCIATED WITH TREATMENT

As your doctor, it is our responsibility to inform you of the potential risks and benefits of your treatment, but we also want to assure you that we strive to minimize these risks by providing thorough clinical examination and by performing diagnostics as clinically indicated. Furthermore, we continually review medical literature pertaining to current trends within our profession as well as throughout the entire medical community to ensure the safest and most effective care.

## Understanding Services Not Considered by Your Insurance Carrier

There are some services that are not covered by your insurance carrier. Below are the services that are not considered by your insurance carrier.

\_\_\_\_\_ (Initial)

**VAX-D (Spinal Decompression) | Cost: \$60.00 / session**

VAX-0 is the brand name of the mechanical traction machine that performs mechanical spinal decompression. VAX-D stands for Vertebral Axial Decompression and is a service prescribed to treat specific issues for the Cervical Spine or the Lumbar Spine. You doctor will advise you if you are a candidate for this service.

If you are prescribed VAX-0 for either the cervical or lumbar spine, the number of visits you are prescribed will vary between 20- 25 visits. The number of visits will vary based on how your body responds to the VAX-0 service. Your visits will include standard post modality care. These standard post modalities are not billed to your insurance carrier. We will not be billing VAX-D services to your insurance carrier. You have 2 options of which you can opt to pay for VAX-D sessions:

\_\_\_\_\_ Option 1: Pay for sessions per date of service without discount

\_\_\_\_\_ Option 2: Pay for sessions in advance utilizing the "Prompt Pay" 10% discount.

If you are having VAX-0 therapy **in combination** with any of the other not-considered services on this list, the cost will be added to your patient responsibility. In cases where a patient has taken advantage of the "Prompt Pay" discount, the patient will be asked for payment of the other services that they have received listed on this advisement.

\_\_\_\_\_ (Initial)

**Functional Dry Needling (FDN) | Cost: \$25.00 / session**

Functional Dry Needling is a **short-term prescribed service** that is performed by a Licensed Physical Therapist. FON requires a short PT Evaluation with the Licensed Physical Therapist who will be performing the service. Your doctor/therapist will be setting the frequency and duration of the short-term prescribed service. In most cases, 3 - 6 sessions are prescribed.

If you are prescribed FON, the FDN service will not be billed to your insurance carrier but all standard modalities and physical therapies will be billed. The cost for the FON will be collected from you at the time of service. If the payment is not collected on the same date of service you have the FON performed, it will be collected from you at the Check In/Check Out and/or be billed to you.

## STATE-REQUIRED ETHNICITY AND RACE QUESTIONS

### BACKGROUND INFORMATION

Texas Law requires the Texas Health Care Information Council to collect information on the race/ethnic backgrounds of medical clinic patients. Medical practices are required to ask patients to identify their own race and ethnic backgrounds.

The data obtained through this process will be used to assist researchers in determining whether all citizens of Texas are receiving adequate health care.

**If a patient fails or refuses to identify their own race and ethnic backgrounds, facility staff will use its best judgment in making the identification.**

### QUESTIONS

Mark the box that most accurately identifies the patient's ethnic background.

## SOAPP® VERSION 1.0-SF

The following are some questions given to all patients at Relief Pain and Wellness who are taking or being considered for opioids for their pain. Please answer each question as honestly as possible. This information is for our records and will remain confidential. Your answers alone will not determine your treatment. Thank you.

Please answer the questions below using the following scale:

0 = Never      1 = Seldom      2 = Sometimes      3 = Often      4 = Very Often

1. How often do you have mood swings? 0 1 2 3 4
2. How often do you smoke a cigarette within an hour after you wake up? 0 1 2 3 4
3. How often have you taken medication other than the way that it was prescribed? 0 1 2 3 4
4. How often have you used illegal drugs (for example, marijuana, cocaine, etc.) in the past five years? 0 1 2 3 4
5. How often, in your lifetime, have you had legal problems or been arrested? 0 1 2 3 4

Please include any additional information you wish about the above answers. Thank you.

## PAIN MANAGEMENT AGREEMENT

I understand that I have a right to comprehensive pain management. I wish to enter a treatment agreement to prevent a possible chemical addiction. I understand that failure to follow any of these agreed statements might result in Dr. Gentry not providing ongoing care for me.

I \_\_\_\_\_ agree to undergo pain management by Dr. Gentry.

I agree to the following statements: I will not accept any narcotic prescriptions from another doctor, including Emergency Room or Dental visits.

I will be responsible for making sure that I do not run out of my medications on weekends and holidays, because abrupt discontinuation of these medications can cause severe withdrawal syndrome.

I understand that I must keep my medications in a safe place.

I understand that Dr. Gentry will not supply additional refills for the prescriptions of medications that I may lose.

If my medications are stolen, Dr. Gentry may refill the prescription one time only if a copy of the police report of the theft is submitted to the physician's office.

I will not give my prescription to anyone else.

I will only use one pharmacy.

I will keep my scheduled appointments with Dr. Gentry unless I give notice of cancellation 24 hours in advance.

I agree to refrain from all mind/mood altering/illicit drugs including alcohol unless authorized by Dr. Gentry.

My treatment plan may change based on the outcome of therapy, especially if pain medications are ineffective. Such medications will be discontinued.

I understand that Dr. Gentry believes in the following "Patients' Bill of Rights."

- Have your pain prevented or controlled adequately.
- Have your pain and medication history taken.
- Have your pain questions answered?
- Know what medication(s), treatment or anesthesia will be given.
- Know the risks, benefits, and side effects of treatment.
- Know what alternative pain treatments may be available.
- Ask for changes in treatments if your pain persists.
- Receive compassionate and sympathetic care.
- Receive pain medication on a timely basis.
- Refuse treatment without prejudice from your physician.
- Include your family in decision-making.

Dr. Gentry may terminate this agreement at any time if he has caused to believe that I am not complying with the terms of this agreement, or to believe that I have made a misrepresentatio<sup>11</sup> or false statement concerning my pain or my compliance with the terms of this agreement.

I understand that I may terminate this agreement at any time. If the agreement is terminated, I will not be a patient of Dr. Gentry and would strongly consider treatment for chemical dependency if clinically indicated.
