WHAT IS H&H IV?

H&H intravenous infusion from Regenerative Medical Group (RMG) is more than just fluid administration for hydration. It helps and supports many of your health conditions, something straightforward like exercise performance to something more serious like chronic illnesses, injuries and Osteoporosis

HOW DOES H&H IV THERAPY HELP ME?

It replenishes your body with vitamins and minerals like calcium, amino acids and other IV medicinal nutrients. It bypasses your gut, infusing medications and nutrients directly into your bloodstream, avoiding any gastrointestinal absorption issues

WHAT IS PRP THERAPY?

PRP is the "platelet rich plasma" that is separated from white and red blood cells when your blood is spun using a centrifuge

HOW DOES PRP HELP ME?

PRP contains growth factors and cytokines that potentially helps:

- Promoting the healing process
- Regenerating damaged tissues
- Decreasing pain

COMBINATION OF PRP & IV THERAPIES CAN SYNERGISTICALLY HELP YOU WITH

- Ankle sprains
- Bursitis
- Golfer's & Tennis Elbow
- Joint arthritis: SI Joint, Spine, Hip, Knee, Ankle, Shoulder, Elbow & Wrist
- Plantar fasciitis
- Shoulder injuries: Rotator Cuff Tears & Labral Tears
- Soft tissue injury: Muscle Tears, Knee Meniscus Tears & Ligaments Sprains
- Tendonitis: Shoulder, Elbow, Hip, Knee & Achilles
