

SUBURBAN EYE ASSOCIATES- BE SAFE

A Message about Corona Virus:

Please read before you enter our office!

During the COVID crisis, expect these changes to eye exams and office procedures:

- **Please check in with the receptionist. She will ask for or give you appropriate paperwork if warranted. Your temperature will be taken and a screening paper will be given to you to complete. For the safety of others, please fill it out accurately. If you have a fever, cough, been around anyone with corona or have been out of the country within the the last month we will request you to leave and call to reschedule your appointment.**
- **You may be asked to wait outside in your car instead of in the waiting room if there are more than 3 people in the waiting room for social distancing. Our staff will call your cell phone when you are ready to be examined.**
- **You must wear a protective face covering or mask. If you do not have one, you cannot be seen.**
- **We are restricting the number of people who enter our offices. Unless you must have someone to assist you, do not bring anyone else into the office and have them wait for you outside. Assistants must wear a face covering or mask and will be screened before entering the office. Please do not bring any unnecessary belongings in with you.**
- **During your examination, your eye doctor will wear a mask or a plastic shield. There may also be special shields on testing equipment.**
- **Your doctor may ask you to wait to speak until after your eye exam is complete. They then will talk with you and answer questions from a safe distance.**
- **If you need to cough or sneeze during your visit, move back from equipment and staff. Bury your face in the crook of your arm or cover your face with a tissue. Wash your hands with soap and water right away.**
