

February is filled with hearts, but we're not talking Valentine's Day. At BioTE, we're focused on American Heart Month.

This month-long celebration encourages everyone to recognize heart and blood vessel diseases and find new ways to support this growing problem. To do our part, we're sharing three heart-essential nutrients that are available right now to all BioTE Certified Providers and their patients.

1. Iodine

An iodine deficiency could lead to significant heart issues, including an abnormally slow heart rate. **BioTE IODINE+** offers patients a 180-day supply of this heart-promoting trace mineral and includes other ingredients, like selenium, that encourage iodine's absorption and use inside the body.

2. Resveratrol

Have you ever heard that red wine is good for your heart? That is in large part thanks to resveratrol, a natural-occurring polyphenol that provides powerful antioxidant support. SENOLYTIC COMPLEX combines resveratrol with four other robust antioxidants to support a healthy heart at a cellular level.

3. CoQ10

Statins are among the most prescribed drugs for patients at risk for heart disease. But did you know this cholesterol-lowering medication may also lower the amount of coenzyme Q10 (CoQ10) in the body? BioTE OMEGA 3 + CoQ10 can help restore normal CoQ10 levels while giving patients heart-healthy omega-3 fatty acids at the same time.
