Informed Consent for Chiropractic Care

Chiropractic care, like all forms of health care, while offering considerable benefit, may also provide some level of risk. This level of risk is most often very minimal, yet in rare cases injury has been associated with chiropractic care. The types of complications that have been reported secondary to chiropractic care include sprain/strain injuries, irritation of a disc condition, and rarely fractures. There are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of a stroke; rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there may be a stroke already in process. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote.

Prior to receiving chiropractic care in this Chiropractic office, a health history and physical examination will be completed. These procedures are performed to assess your specific condition, your overall health and, in particular, your spinal health. These procedures will assist us in determining if chiropractic care is needed, or if any further examinations or studies are needed before treatment. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another health care provider. All relevant findings will be reported to you along with a care plan to help you become healthier prior to beginning care.

I understand and accept that there are risks associated with Chiropractic care and give my consent to the examinations that the doctor deems necessary, and to the chiropractic care including spinal adjustments and other modalities, as reported following my assessment.
