## Biopsy Site Care Instructions

1. Leave the bandage on for a full 24 hours and keep the area dry.
2. After 24 hours-
  - a. Remove the bandage.
  - b. Cleanse the area with  $\frac{1}{2}$  hydrogen peroxide and  $\frac{1}{2}$  water and pat dry.
  - c. Apply a thin film of Polysporin ointment.
  - d. Apply clean bandage.
3. Repeat step #2 every day until the site is healed.
4. Call the office at (949) 640-0434 for any signs of infection. Signs of infection are redness, swelling, pain or drainage at the site.
