HYDROGEN BREATH TEST

DISCUSS MEDICATIONS and HEALTH CONDITIONS you have with your doctor.

Your doctor will provide instructions for how to appropriately adjust your medications prior to your test. Instructions may include the following changes:

- Take scheduled medications at least 2 hours prior to your test with a small amount of water.
- The hydrogen breath test help determine if you have bacterial overgrowth within the small intestine. This test takes approximately 90 minutes.

ONE WEEK BEFORE THE TEST Do not take any laxatives, stool softeners or fibers. These include Colace, Ex-Lax, Miralax, Metamucil, Benefiber, Citrucel and Magnesium Citrate. You should not also undergo any tests that requires cleansing of the bowel such as colonoscopy or barium enema.

THE NIGHT BEFORE YOUR TEST Do not eat or drink anything after midnight.

THE MORNING OF YOUR TEST take your usual morning medications (including blood pressure medications), at least 2 hours prior to your procedure with a small amount of water.
