

## WHY ARE THE BENEFITS OF IV THERAPY?

The importance of vitamins, micronutrients, and minerals in one's well being cannot be overstated. What we eat is largely influenced by our upbringing and also our culture. Most people can not get all of the nutrients they need to battle illnesses or sustain a healthy lifestyle considering the limitations of their dietary practice. Iv infusion can help bridge this gap by providing your body essentials that are crucial to maintain a healthy lifestyle

This therapy also provides faster hydration for individuals who recently came out of surgery and have lost a significant amount of fluids. IV Infusion therapy is also a good option for people who have been unresponsive to oral supplements

## HOW OFTEN DO I NEED IT?

This therapy is planned keeping your schedule at the center, which means that you get to decide when and how often you'd like to undergo infusions, i.e. once or twice a week, according to the doctor's recommendation

## HOW DOES IT WORK?

IV infusion is usually a quick and simple infusion. The length of treatment is determined by the type of infusion you are receiving. You don't need to stay overnight, because it normally takes 30 - 40 minutes

## HOW SOON CAN I NOTICE THE EFFECTS?

Most patients feel the effects can be felt almost immediately in some situations. The best part is that post the infusion, the effects can last for several days or weeks

## WE ACCEPT

- Medicare
- BlueShield
- Cigna
- Humana
- Tricare
- UHC

# IV INFUSION THERAPY

[www.rmg.life](http://www.rmg.life)

## WHAT IS IV INFUSION THERAPY?

IV or Intravenous Therapy is when a substance or medication is infused directly into the vein for treatment. Most commonly in health care, it is used to deliver electrolytes with water for hydration or medications to treat an illness effectively. IV infusions are a fast and efficient delivery method for treatment.

It may be used to deliver nutrients and vitamins directly into the bloodstream which bypasses the gastrointestinal (GI) tract and are readily available to the cells.

It can result in a higher absorption rate and quicker relief for acute to chronic conditions. RMG's IVs are clinically improved and customized for each individual based on their conditions and comorbidities.

"It is well known most of us do not consume all the nutrients needed and as we age, our GI tracts often are not able to absorb nutrients especially in many diseased states. IV Infusion Therapy at RMG contains vitamins, amino acids, proteins, peptides and nutraceuticals.

## RMG'S PROPRIETARY PROTOCOLS ARE DEVELOPED & CONSOLIDATED BASED ON THE TISSUE OR BODY SYSTEM THAT NEEDS SUPPORT FOR IMPROVED FUNCTION

- Autoimmune IV
- Detox IV
- Gut Health IV
- Healthy Brain IV
- Heart Health IV
- Immune Booster
- Kidney Support IV
