Contact Lens Examination and Fitting

In accordance with Federal and State Guidelines, a contact lens prescription is valid for one year

The contact lens fitting is a supplemental examination that must be administered in addition to the yearly comprehensive eye examination in order to determine or update your contact lens prescription. The contact lens examination and fitting must be done yearly for contact lens wearers. This exam is used to check whether your eyes are healthy enough to wear contact lenses, measure the curvature and diameter of your eye to properly match the suitable contact lenses for your eye, as well as to determine the contact lens prescription.

Without this exam the doctor will not be able to determine a change in your contact lens prescription. If you refuse this exam, we will not be able to provide you with a contact lens prescription.

Pricing and Fees

Standard Contact Lens Fitting and Evaluation	\$70
(Distance only / One Correction)	
Premium Contact Lens Fitting and Evaluation	\$100
(Monovision / Multifocal / Toric)	
Presbyopia Fitting	\$130
Contact Lens Beginner Package**	\$120

****Contact Lens Beginner Package**

The contact lens prescription will not be released without first ensuring that each patient receives proper training and is able to insert and remove the contact lenses on his or her own. The training includes at least a 30 minute instruction course with an Eye Care Professional, trial contact lenses, and a contact lens starter kit.
