COVID-19 Testing Information and Instructions

To increase the safety of our patients and staff and reduce the risk of COVID-19 transmission, COVID-19 rapid tests are required for select procedures in our office for patients who do not have a vaccination. If you are having one of the procedures listed below it is vital for you to complete your COVID-19 test as instructed in order to have your procedure. If your COVID-19 test is not completed prior to your procedure, your procedure will be postponed and rescheduled to a later date. If your COVID-19 test is positive your procedure will also be postponed and rescheduled to a later date.

COVID-19 testing is now being performed in our Brighton office during monitoring hours with a scheduled appointment.

➤ **Oocyte Retrievals**

- If not vaccinated, the covid test must be completed on the day of Stim Start

➤ **Embryo Transfers**

- If not vaccinated, The covid test must be completed 1 day prior to the lupron start date and if not using lupron 1 day prior to estrace start date
- If not vaccinated, The covid test must be repeated 1 days prior to progesterone in oil start

➤ **Procedures with Anesthesia**

- If not vaccinated, The covid test must be completed 1 days prior to the procedure date.

If you are unable to visit our Brighton location on the specified date, you may get a rapid test at another facility on that date and provide us with a copy of the test result the same day.
