Embryos Available in Our Embryo Donation Program

CHR's [embryo donation program](#) utilizes embryos donated anonymously by infertile patients/couples for such a purpose. The availability of embryos is usually limited and embryo donation does not offer the wide variety of choices that [egg donation](#) and sperm donation allows. Below is a list of embryos currently available for embryo donation at CHR. The list is steadily updated, as recipients receive some of the embryos and new embryos get donated.

Asterisk (*) denotes that the embryos were created with donor eggs and/or sperm. Embryos without an asterisk were created with the patients' own eggs and partners' sperm. If you have any questions about our embryo donation program, please [contact us](#).

Embryo Donation #DE1062

Number of embryos available: 1 [Please inquire about the FDA testing status of these embryos.]

Attributes	Female*	Male
Age	19	41
Ethnicity	Iraqi, Hungarian, Czech (Half Ashkenazi & Half Sephardic Jewish)	Irish, Russian (Half Ashkenazi Jewish)
