

WHAT ARE THE BENEFITS OF IV THERAPY?

The importance of vitamins, micronutrients, and minerals in one's well-being cannot be overstated. What we eat is largely influenced by our upbringing and also our culture. Most people cannot get all of the nutrients they need to battle illnesses or sustain a healthy lifestyle considering the limitations of their dietary habits. IV infusion can help bridge this gap by providing your body essentials that are crucial to maintain a healthy lifestyle.

This therapy also provides faster hydration for individuals who recently came out of surgery and have lost a significant amount of fluids. IV Infusion therapy is also a good option for people who have been unresponsive to oral supplements.

HOW OFTEN DO I NEED IT?

IV therapy usually takes place 1-2 times per week. We will accommodate your schedule the best we can. Each infusion normally takes approximately 30 minutes.

HOW SOON CAN I NOTICE THE EFFECTS?

Most patients feel the effects almost immediately in some situations. Effects can even be felt several days to weeks post infusion.

IV INFUSION THERAPY

agelessregenerativemedical.com

WHAT IS IV INFUSION THERAPY?

IV or Intravenous Therapy is when a substance or medication is infused directly into the vein for treatment. IV infusions are a fast and efficient delivery method for treatment.

IV therapies may be used to deliver nutrients and vitamins directly into the bloodstream which bypasses the gastrointestinal (GI) tract and are readily available to the cells.

It can result in a higher absorption rate and quicker relief for acute to chronic conditions. ARM's IVs are clinically improved and customized for each individual based on their conditions.

Most of us do not consume all the nutrients we need for optimal health. As we age, our GI tracts are not able to adequately absorb nutrients, especially in diseased states. We can test your specific nutritional deficiencies and correct these with IV therapy.

AGELESS REGENERATIVE MEDICAL (ARM) IS A CLINIC WITHIN REGENERATIVE MEDICAL GROUP (RMG), IN WHICH PROPRIETARY PROTOCOLS ARE DEVELOPED & CONSOLIDATED BASED ON THE TISSUE OR BODY SYSTEM THAT NEEDS SUPPORT FOR IMPROVED FUNCTION.

- 🔍 Autoimmune IV
- 🔍 Detox IV
- 🔍 Gut health IV
- 🔍 Healthy brain IV
- 🔍 Heart health IV
- 🔍 Immune booster IV
- 🔍 Kidney support IV
- 🔍 Liver health IV
- 🔍 Lung health IV
- 🔍 Mood & stress IV
- 🔍 Pain & inflammation IV

HOW DOES IV INFUSION THERAPY BENEFIT YOU?

The infusion of vitamins, fluid and micronutrients delivered into your circulatory system feeds every cell in your body, allowing cells and functional pathways to work optimally.

WHAT CONDITIONS CAN IV THERAPY HELP WITH?

Along with providing hydration and nutrition deficiencies, remarkable improvements in function have been noticed in the following chronic inflammatory conditions:

- 🔍 Cardiovascular diseases
- 🔍 Carpal tunnel syndrome
- 🔍 Chronic or mental fatigue
- 🔍 Crohn's disease
- 🔍 Dehydration
- 🔍 Fibromyalgia
- 🔍 Gastrointestinal diseases / disorders
- 🔍 Hemophilia
- 🔍 Immune deficiencies
- 🔍 Inflammatory bowel syndrome
- 🔍 Multiple sclerosis
- 🔍 Osteoarthritis
- 🔍 Rheumatoid arthritis
- 🔍 Serious infections
- 🔍 Tendonitis
- 🔍 Vasculitis
