

Children's Clinic

Trusted by Families for Generations

The Children's Clinic is looking to hire two (2) pediatricians to join our practice in Billings, Montana. We are lucky to have been trusted by families in our community for generations. We are looking for engaged, high quality pediatricians to help us continue this commitment to our patients.

Interested in a Career with the Children's Clinic? You will get:

- A **longstanding practice** with two locations that has been serving our community for over 70 years and boasts a **stable patient pipeline** and the opportunity to **practice rural medicine in a suburban setting**
- The **flexibility** from being a physician-owned practice that allows us to craft your **ideal practice** around you, but with the benefit of having enough pediatricians to offer the **lifestyle benefits** that come with being a larger, system-owned practice
- The chance to **be mentored and to mentor**. Our pediatricians practice as a group. While you will have your own panel, our pediatricians lean on each other to provide the best care to our patients. We also precept residents, medical students, and NP/PA students. So, you will have many opportunities to engage in medical education, if you enjoy it
- To practice **best practice pediatric care**. Highlights include being a data-driven practice that follows AAP/Bright Futures guidelines, conducts PCR COVID/flu/RSV and strep testing in house and installed negative pressure rooms to provide the highest level of safe care during the pandemic, utilizes spirometry for asthma diagnosis and management, produces some of the best pediatric vaccination rates in the state, employs a lactation consultant whose services are offered free-of-charge to all newborn moms, and is always looking to improve how we care for our patients
- An **intentional, supportive, and excellence-driven clinic culture**. We **actively** build our culture here and look for physicians and staff who are not only good clinicians, but have the right attitude and personality to fit our team
- **Very competitive compensation** and benefits including the opportunity to become a physician owner with profit sharing after the first employed year

Practice Setting

Billings, Montana is the medical, financial, and industrial hub of a three-state area that includes Wyoming and North Dakota. At 110,000 residents, Billings is the largest city in Montana and boasts two colleges, a vibrant downtown, great restaurants, many craft breweries and distilleries, and a very strong medical community that draws patients from across Montana and northern Wyoming. It's surrounded

by the great outdoors – we’re Big Sky Country, after all! Billings is framed by the Yellowstone River along the city’s southern edge and high sandstone cliffs – called the Rimrocks or “Rims” – to the north. Multiple mountain ranges can be viewed from the clinic’s windows.

Mountain biking, hiking and backpacking, whitewater rafting, camping, and world-class fly fishing are just a few of the outdoor activities at your fingertips. In the winter, three ski resorts are less than three hours away – and Red Lodge Mountain Resort is just an hour from Billings.

About Us & Our Culture

Children’s Clinic is a full-service pediatric practice dedicated to delivering top-quality care to children from birth through their teenage years. Our practice has earned a reputation for excellence in the region and is the only independently owned pediatric practice in Billings. Our team of highly skilled, board-certified pediatricians and our adolescent health nurse practitioner provides personalized, unrushed care.

As an independent practice, the Children’s Clinic has the flexibility to respond to a wide range of patient needs while giving our pediatricians autonomy to craft their schedules and their patient care to match each pediatrician’s unique practice style. Because of our size, we can provide excellent care and meet patients’ needs by offering expanded hours (including evening and weekend clinics) without compromising our physician’s ability to take care of their own families and find balance outside of the clinic.

Beyond patient care, we work hard to build an active, intentional, and positive culture. Our vision is “always better; never perfect,” which allows us to pursue excellence, while offering grace to each other. We make hiring decisions based as much on cultural fit as clinical competence.

Meet our Current Providers

We are fortunate to currently have 10 outstanding pediatricians, an all star nurse practitioner who specializes in adolescent health, and an IBCLC-certified lactation consultant.
