

Find the Best LASIK Surgeons in NJ & NY

How to Find a Great Lasik Surgeon

There are horror stories in the news every day about the victims of inexperienced surgeons. Don't sacrifice your eyesight to a poorly trained LASIK surgeon by simply choosing a name that sounds nice from the phone book. Be sure the surgeon you choose is one of the best LASIK surgeons in NJ & NYC. Use the many resources at your fingertips to improve your chances of getting great results. Your vision is worth the effort!

- How do you find the very best LASIK surgeons in NJ or NY for your LASIK surgery?
- What [important LASIK questions](#) should you ask?
- [Is LASIK what you need](#) or would a [different laser procedure](#) be better for you?

Don't be swayed by advertisements, billboards, testimonials and special offers. [LASIK advertising](#) can be deceptive and is no indication of a physician's expertise. To find the best LASIK surgeons in NJ & NY, it's vital to do your research. It's your eyesight; be absolutely sure.

Make a List & Network with Friends

Use your phone book to look up every [LASIK](#) surgeon and list their contact information. Find each one on the Internet and make notes of any recommendations or complaints you find. Remove those with poor reviews from your list.

Visit the websites of those recommended as the best LASIK surgeons in NJ or NYC to get a general sense of their background, training, specialties and their practice. Does the website give you a lot of helpful information? Is it up to date?

Ask your family doctor for recommendations. He or she should be quite familiar with specific ophthalmologists and LASIK surgeons in your area and will give you a well-informed opinion. Someone in your doctor's own family may have had LASIK surgery with excellent results.

Ask for references from family and friends and add these notes to your list. Although your friend may have undergone a completely different eye surgery, the surgeon may have the necessary skills to perform a wide variety of [similar procedures](#). Networking with your friends and family may help you find the best LASIK surgeons in NJ & NY.

Investigate the Credentials of Each Surgeon

To get the best results, you should look for a board certified Ophthalmologist. Board certification *does matter*. Finding one of the best LASIK surgeons in NJ or NY who is a board certified ophthalmologist will improve your odds for the best outcome. Any doctor can claim to be board certified but it may not be true. It's also possible that the surgeon is board certified in another medical specialty but not in ophthalmology. Verify it by using the free research tools

available to you on the Internet.

Check the credentials of each surgeon on your list with the [American Board of Medical Specialties](#) (ABMS). Make sure the American Board of Ophthalmology (ABO) granted the certification. ABO certification is the only one recognized by both the ABMS and the American Medical Association. You can also call the ABO at (610) 664-1175 for verification.

Get Comfortable with Each Surgeon

Whittle down your list to your top 10 choices. Make a consultation appointment with each surgeon on your list. Discuss your goals for treatment, whether you are a good candidate for LASIK surgery, the [potential risks](#), costs and alternatives. Check out the staff and surroundings. Is everyone helpful and knowledgeable? Is the surgeon willing to spend time with you to answer your questions about his or her qualifications, experience, and all of your laser vision correction options?

Don't be shy; you want to walk away with a complete understanding of what will be the best solution for your unique situation. Try to spend 30 minutes with each doctor to find out which one makes you most comfortable. If the staff rushes you, they may also rush your surgery or after-care.

Add Us to Your List of the Best LASIK Surgeons in NJ and NY
