This quiz is not a full evaluation but will aid in conversations with your healthcare providers

Your quiz result showed:

- You likely do not have an increased hereditary risk based on these quiz results
- Red Flags* identified for Hereditary Breast and Ovarian Cancer Syndrome (HBOC)
- Red Flags* identified for Lynch Syndrome

Visit mySupport360.com for more information about the most common hereditary cancer syndromes

*Red flags are indicators in your personal and family history suggesting that testing for a hereditary cancer syndrome may be right for you.

The questions included in the quiz are based on the clinical guidelines doctors use to determine whether you should be tested for a hereditary cancer syndrome. This quiz helps you to learn about your risk so you can be prepared to talk to your doctor about further evaluation of your personal and family history of cancer.
