

## **Prescriptions for Surgery:**

The following medications are commonly prescribed before surgery for Abdominoplasty, Panniculectomy, Body Lift, Thighplasty, Brachioplasty, Breast Augmentation and Breast Reduction procedures. You will need to pick these up at your pharmacy prior to your procedure. Their uses will be reviewed during your pre-op appointment with Dr. Ditto. These medications are crucial to your operative care.

**IF YOU HAVE ANY MEDICATION ALLERGIES PLEASE LET DR.DITTO KNOW IMMEDIATELY.**

<u>Medication</u>	<u>Purpose:</u>	<u>Use:</u>
Tylenol #3 or Norco Tramadol 50mg <i>If you have a codeine allergy, you will be prescribed Tramadol instead.</i>	<i>Pain</i>	Take 1-2 tablets every 4 hours for pain as needed.
Zofran ODT 4MG	Nausea	Take 1 tablet every 4 hours for nausea.
Flexeril 10MG	Muscle relaxer	Take 1 tablet three times daily PRN muscle spasm.
Keflex 500MG	Antibiotic	Take 1 tablet every 8 hours for 10 days (complete entire course).
Bactrim DS	Antibiotic	Take 1 tablet twice daily for 10 days (complete entire course).
<i>If you have an allergy to Keflex, you will be prescribed Bactrim DS.</i>		

From the compound pharmacy:

MSC-1 Scar Cream            For use 6 weeks after surgery for scarring and incision sites.

Nausea Cream                For use immediately following surgery. Use as directed.

*We will give these on an on requested basis.*

\*Note you may not receive all the prescriptions above. We will discuss your regimen at your preoperative appointment.

Thanks,

Dr. Ditto
