

New York City LASIK: Top 5 Benefits

Can LASIK Change Your Life?

Are you sick and tired of your glasses and contact lenses? Is it a hassle to deal with your contacts throughout the day and night? Do your glasses fog up in cold weather or leave big dents on the bridge of your nose? Do you get tension headaches? Don't you want to start seeing the world through your OWN eyes? New York City LASIK surgery is the ideal permanent solution!

It's time to make 20/20 vision your top priority. LASIK surgery today is very sophisticated and is customized for your unique eyes. LASIK is safe, fast and easy, and offers **life-changing results**. Your #1 choice for New York City LASIK surgery should be [Ilan Cohen, MD](#).

Imagine the freedom of enjoying your favorite activities like swimming, scuba diving, playing contact sports, even shaving in the shower, without the hassle of glasses or contacts. [Choosing your LASIK surgeon](#) will be the most important thing you do next. But, in the hands of Dr. Cohen, known as the "experts' expert", you can join the ranks of millions of Americans who never have to worry about corrective lenses again!

Life is beautiful. Here are 5 reasons to take action TODAY so you can see all of it clearly, through your own eyes!

1. LASIK is FAST

[LASIK](#) works by using cool laser beams to reshape your cornea to correct the errors that are causing your poor eyesight. It takes Dr. Cohen only about **15 minutes** to correct both eyes! Most patients spend no more than one hour for the entire process, which allows Dr. Cohen time to properly check your corneal flaps before you go home after surgery. You'll be able to drive the day after the procedure and return to work in 24 to 48 hours.

*"The procedure went by very quickly, believe it or not, and the actual time when they're working on your eyes is very very fast." **Frank Beres; 5th Avenue Eye Center LASIK patient***

2. LASIK is virtually PAINLESS

Most patients are surprised that LASIK surgery is so [easy and painless](#). When Dr. Ilan Cohen performs your New York City LASIK surgery, he will first numb your eyes with anesthetic eye-drops and **you will feel nothing at all**. Some patients may feel a little pressure during the short procedure, but there is never any discomfort. In the hours after surgery, any minor irritation you feel can be alleviated with artificial tears and a good night's sleep.

*"So, it was a little bit uncomfortable when the doctor was trying to put the tool to open up your eyes, and you kind of like stare. But other than that I didn't feel any pain at all." **Effendy W.; 5th Avenue Eye Center LASIK patient***

3. LASIK offers AMAZING RESULTS

No one can promise you perfect vision but, using the latest state-of-the-art [New York City LASIK technology](#), Dr. Ilan Cohen can improve the vision of nearly anyone with nearsightedness, farsightedness or astigmatism. He has earned accolades from his colleagues and offers you the highest quality LASIK eye surgery in the nation. Most patients will experience significant improvements before they even leave the eye center. Others will find their vision improving in the three weeks following surgery. His expertise in New York City LASIK surgery allows Dr. Cohen to give you **20/20 vision or better!**

"It's so nice sleeping and waking up and seeing; and watching TV and falling asleep on the sofa and not having that guilty feeling about not taking your contacts out." Elizabeth S.; 5th Avenue Eye Center PRK/LASEK patient

4. LASIK is SAFE

Any surgery comes with some risks but, when performed by a highly-qualified and skilled surgeon such as Dr. Ilan Cohen, LASIK is safe. With Dr. Cohen as the surgeon, better than **99% of his LASIK patients have no complications at all** and are thrilled with the results of their surgeries. You may be in the small group of patients who experience a [minor complication](#), but Dr. Cohen will discuss each of these thoroughly with you before surgery so you'll know what to expect. Fortunately, because LASIK technology has vastly improved over the years and Dr. Cohen is one of the most skilled LASIK surgeons in the nation, your risk of complications is very low.

"I ...looked for someone who was precise with a high degree of attention to detail, and Dr. Cohen certainly demonstrated that... He re-checked the measurements three times... That was very impressive to me, that someone took so much care in making sure that the measurements were correct." Gavin Samuels, M.D.; 5th Avenue Eye Center LASIK patient

5. New York City LASIK is AFFORDABLE

In general, the cost for New York City LASIK varies between \$1,750 and \$3,000 per eye, based on your prescription. Now, add up how much you spend every month on contact lenses and solutions, or on glasses every few years, and multiply it out over your lifetime. It adds up quickly, right? Choosing a one-time procedure like LASIK can actually be far more economical and save you a lot of money in the long run. But, [how can you afford LASIK](#) if you have to pay the expense all at once? The good news is that you don't! You can find out in minutes if you qualify for one of our financing programs to fit your budget (and 90% of our patients do). Our financing counselors will prove that **you CAN afford New York City LASIK** surgery and your dreams of clear vision!
