

WELCOME TO OUR PRACTICE

Your First Visit

Thank you for scheduling an evaluation appointment with us. We would like to make this appointment useful and pleasant for you so we have prepared this introduction so that you will know what to expect. The purpose of this initial consultation is to collect basic information about you and the clinical concern which you would like assistance. It is our goal to formulate an initial diagnosis and treatment plan during this session, but sometimes this requires more than one visit.

There are a few steps that you can take to prepare for the consultation:

- Prior to your appointment, we ask that you complete the patient registration in its entirety. Arrive 15 minutes prior to the scheduled appointment time with your completed paperwork and the other required items noted below.
- Call your insurance and verify if you need any authorization for your first visit to our office. When calling please specifically ask if your coverage requires Outpatient Mental Health authorization and what your copay or coinsurance is to see our clinician.
- Please bring these items to your first appointment.
 - **New Patient registration - completed**
 - **Insurance card & authorization information**
 - **Photo ID/Driver's License (if a child, the parents ID).**
 - **Preferred Pharmacy Name, Address & Number if seeing a psychiatrist**

If you do not bring the insurance related items, this will result in your being responsible to pay your visit in full, until we have the information required for insurance filing.

- Prepare a list of prior and current medications, dosage, effectiveness or side effects; bring copies of psychological testing reports, and your family history of psychiatric conditions or treatments.
- It is also helpful if you think about what you would like to accomplish with your treatment. Psychological therapy is a team effort.

Our treatment approach

Our mission is to provide you the best treatment available. Different problems require different treatments. We strive to discover the best approach for you. We may refer you to someone else for a particular skill or therapy.

In addition, there are some factors that always lead to better results.

1. Honest and open communication- we only know what you let us know.
2. Following the treatment plan the best you can.
3. If you have questions, please ask.
4. Keeping appointments at suggested intervals leads to the best results.
5. If you experience an unexpected side effect from treatment, let us know ASAP.
6. The best practice is to give medication prescriptions during a face-to-face visit.
7. Communication with your other health care providers is usually helpful, but let us know if you prefer for us to not to do this.
