### WHAT TO EXPECT

You will receive an injection of nuclear medicine to take images of your heart. After a short wait, you will sit in an imaging chair which will get several views of your heart. Then you will come back 4 hours later and get another set of images. Some patients will receive 1 more injection and do another set of images. This would be determined at the time of the visit. Some patients will need to return 24 hours later for one last set of images.

### HOW TO PREPARE

- **Nothing to eat or drink after midnight the night before your appointment.**
- **You can take all your normal medications the morning of the test with a small sip of water.**
- **You will be able to eat after the first set of images are taken.**
