# A MESSAGE FROM OUR CEO **TAMRA KING**

“

*HarborCHC was awarded HRSA's Health Center Quality Leader Gold badge for the second year in a row, with an additional six Health Quality badges.”*

**DEAR FRIENDS AND NEIGHBORS,**

**T**his past year, Harbor Community Health Centers (HarborCHC) has faced many challenges. However, I am proud to report that we have not only met those challenges head-on, but we have grown in the process. This would not have been possible without our amazing team of providers and support staff, whose dedication and compassion have inspired me throughout the year.

I would also like to thank our patients, whose valuable input helped us increase healthcare access in our region. In 2025, as a result of community feedback, we expanded clinic hours and available appointment times. We enhanced many programs and services including our nutrition services and mental health support groups. Continuing this expansion, we also signed a lease for our new Long Beach Health Center (LBHC) and hired additional staff members to help us better provide quality, culturally responsive, accessible care that centers the needs of our community.

This past year, I also attended a joint session of Congress as a guest of Congresswoman Nanette Díaz Barragán on behalf of the HarborCHC team, which has been recognized on a national level. In 2025, our efforts were recognized by the Health Resources & Services Administration (HRSA). HarborCHC was awarded HRSA's Health Center Quality Leader Gold badge for the second year in a row, with an additional six Health Quality badges. HarborCHC is one of only five health centers in the entire nation to receive seven awards. Read on to learn about how this award-winning care has made an impact on our patients.

From the entire team at HarborCHC, thank you for helping us reach new heights in patient care — in 2025 and always.

With deep gratitude,

**TAMRA KING**  
CHIEF EXECUTIVE OFFICER

# A MESSAGE FROM OUR BOARD CHAIR **BIANCA BANKS**

**DEAR PARTNERS AND COMMUNITY MEMBERS,**

**A**s I reflect on the depth of our impact throughout 2025, I am filled with appreciation for the HarborCHC team. The awards we received from HRSA this year merely reaffirm what I already know — that our staff goes above and beyond to give our patients the best possible care every day.

But as an organization driven to provide the highest level of person-centered care, I also know there is still work to do. That is why we now have our eyes trained toward the exciting plans we have slated for 2026.

This has already been a banner year for HarborCHC, with the grand opening of our Long Beach Health Center. Our third clinic and expansion into Long Beach will further strengthen our community presence and our impact.

We are now building on this forward momentum, as we implement plans to streamline the patient experience and enhance our care offerings in the months and years ahead. We do this in partnership with HarborCHC staff, partners, community members and our many generous supporters, who continue to advance our mission.

As you read about the impact of our work throughout 2025, I hope you will be inspired by our dedication to the patients who have placed their trust in HarborCHC. As we move into 2026, I warmly invite you to join us as we explore new opportunities to serve our patients and community.

In partnership,

**BIANCA BANKS**  
BOARD CHAIR

“

*Our third location will further strengthen our community presence by expanding our service line and our reach.”*

▲  
**DR. CALEB LUSK,  
CHIEF MEDICAL OFFICER**

## BADGES OF **HONOR**

Each year, HRSA awards Community Health Quality Recognition (CQHR) badges to health centers across the county. CHQR badges recognize notable achievements in the areas of access, quality, health equity, health information technology and social risk factors. HarborCHC is proud of our sustained excellence as a community-serving healthcare provider, and we are especially honored to have been awarded seven HRSA badges, illustrating both the exceptional quality and wide-ranging impact of the services we provide to our patients.

# HEALTH CENTER QUALITY LEADER

# GOLD LEVEL

HarborCHC earned the Gold Health Center Quality Leader badge for the second year in a row, once again being recognized in the top 10% of health centers nationally.

We are one of only 15 health centers in California and one of 143 nationally to receive this recognition, reflecting the quality of our team and the care we offer to patients.

This recognition exemplifies HarborCHC's deep community investment and positions us as a model for health centers in our region and nationally.

*These badges highlight the hard work our HarborCHC team puts into delivering comprehensive, patient-centered care. We are ensuring every patient has the support they need to achieve their best health, in a welcoming, accessible space.*

*I am proud to be part of a team recognized by HRSA for our commitment to serving patients of all backgrounds and from all walks of life, with care and respect.”*

**CALEB LUSK, MD**  
CHIEF MEDICAL OFFICER

▲  
**SUNEUN "SARAH" REICHERT, DO**  
FAMILY MEDICINE PHYSICIAN

# NATIONAL QUALITY LEADER BEHAVIORAL HEALTH

*Receiving the HRSA award is a testament to our collective commitment to advancing equitable access to behavioral healthcare. We believe mental health is central to community health. Every day our team strives to create a safe, compassionate space where individuals and families feel seen, supported and empowered to heal."*

**MAYRA GONZALEZ, LCSW**  
DIRECTOR OF BEHAVIORAL HEALTH

HarborCHC provides support to those navigating mental health conditions through comprehensive mental health screenings, culturally affirming individual and family psychotherapy and support groups, helping to reduce stigma and encourage social connections.

The Behavioral Health badge indicates that we met or exceeded benchmarks in at least two of the three following measures: patients reported depression remission, patients received screening for depression and a follow-up plan, or patients reported screening, brief intervention, and referral to treatment — the full spectrum of care — at rates higher than the national average. **In 2025, we provided mental health services to 735 patients.**

▲ **ERVIN PINEDA, AMFT**  
ASSOCIATE MARRIAGE AND FAMILY THERAPIST

## PATIENT STORY **TIFFANY SEGOVIANO**

"I've always struggled with depression and anxiety. I started therapy at HarborCHC because I wanted a space to talk about what I was feeling and start working on myself in a healthy way. Since starting therapy, I've noticed a lot of positive changes. I'm more confident with decision making and am more open-minded. I have been able to get things off my chest that I might not have been able to before; it really helps to have a healthy outlet. I've even started dating, going out more and talking to people — things I used to avoid. I started setting boundaries for myself without feeling bad about expressing my needs. That was a big step for me, and it showed me that I'm growing."

# NATIONAL QUALITY LEADER **HEART HEALTH**

Chronic diseases, especially heart disease and high blood pressure, require ongoing medical management to prevent complications and slow disease progression. At HarborCHC, we prioritize heart health through our primary care providers, who create individualized care plans, monitor risk factors, and coordinate preventive services to help patients maintain cardiovascular wellness and overall well-being. **We cared for 1,469 heart health patients in 2025.**

As a recipient of the Heart Health badge, we have met or exceeded benchmarks in at least three of the four following measures: patients were screened or offered cessation intervention for tobacco, patients with ischemic vascular disease (IVD) utilized aspirin or another antiplatelet to maintain cardiac health, statin therapy was utilized to prevent and treat patients navigating cardiovascular disease, or patients effectively controlled high blood pressure, or hypertension, at rates above the national average.

*Securing this Heart Health award was the collaborative work of our providers to improve cardiovascular care for our patients. By combining data-driven outreach from our QI team with hands-on support from providers, diabetes champions, Harbor FIT team, pharmacists and dietitians, we deliver truly integrated cardiovascular care that improves and saves lives.*

*Patients benefit most when heart health is addressed from multiple angles. Our specialty programs allow providers, pharmacists and registered dietitians to work together to empower patients to better control their hypertension, diabetes, weight and overall cardiovascular risk over time."*

**FOYA TAVANGARY**  
PHYSICIAN ASSISTANT

▲  
**VANESSA APODACA,**  
MEDICAL ASSISTANT

# NATIONAL QUALITY LEADER

# DIABETES HEALTH

FEMI AKINNAGBE, MD  
PHYSICIAN

Our Diabetes Champions team, which includes a clinical pharmacist, wound care-focused podiatrist, registered dietitian and other providers, is improving diabetes health outcomes for our patients. We offer nutrition guidance and health education, bolstering our holistic supports for patients, families and caregivers.

**In 2025, we provided diabetes management support to 1,128 patients.** The Diabetes Health badge shows that HarborCHC has met or exceeded benchmarks in at least two of the three following measures: patients received an adult body mass index (BMI) screening and follow-up plan, child and adolescent patients had their weight assessed and received counseling for nutrition and physical activity, or patients with diabetes presented uncontrolled diabetes, measured via Hemoglobin A1c (HbA1c), at rates lower than other health centers.

## PATIENT STORY

■ A patient came to HarborCHC with chronic wound issues, resulting from poorly managed diabetes. The impact of the injury was far-reaching: Because of the pain, they had trouble finding housing and eating nourishing foods. Their mental health plummeted. Our multidisciplinary care team recognized these issues and took a big-picture approach to healing. With their guidance, the patient began to slowly but steadily improve. They adopted a physical fitness regime. They began showing up for weekly wound care management. And they achieved glycemic control. Today, the patient has not only improved health, but a renewed sense of confidence and wellbeing.

# PREVENTIVE HEALTH

HarborCHC was also awarded a Preventive Health badge, demonstrating strong performance in preventive care for patients of all ages, meeting or exceeding at least five of the 10 following targets measuring preventive care: patients received dental sealants, weight assessments and counseling, childhood lead screenings, routine developmental evaluations, depression screenings with appropriate follow-up, tobacco-use screening and cessation interventions, adult BMI screening and follow-up, and breast, cervical, and colorectal cancer screenings.

Our health team, including primary care providers, nurses and health educators, works closely with patients to identify risks and provide timely interventions. Primary and preventive services are central to building healthier habits, preventing disease and maintaining long-term wellness.

**Last year, we provided primary and preventive care through 45,914 patient visits.**

*Preventive medicine is the heart of primary care. By taking a team approach, including our providers, medical assistants and quality improvement team – the whole clinic – we have been able to focus on the heart of what we do and uplift the community.”*

**FEMI AKINRAGBE, MD**  
PHYSICIAN

▲ **JEFFREY RAMIREZ, MD**  
PEDIATRICIAN

# ADVANCING HIT FOR QUALITY

(HEALTH INFORMATION TECHNOLOGY)

*“Our Televideo tool allows providers and patients to see each other and view health data together during a telehealth appointment.*

*Our remote patient monitoring programs provide real-time data from patients with chronic conditions such as diabetes and hypertension.*

*These tools allow care teams to proactively adjust treatment plans with more responsive, personalized and effective care.*

*Los Angeles Network for Enhanced Services (LANES) Health Information Exchange is also integrated into our electronic medical records (EMR), improving care coordination, patient safety and access to clinical information across multiple healthcare systems.”*

**ARACELY SCERRA**  
QI/RM DIRECTOR

In 2025, we advanced the use of health information technology through telehealth expansion, increasing the accessibility of our services. In receiving the Advancing Health Information Technology (HIT) for Quality badge, we met or exceeded benchmarks in at least two of the following measures: offering telehealth services, exchanging clinical information electronically with key providers and care settings, engaging patients through HIT tools, or collecting data on patient health-related needs to better inform care.

We use telehealth services to connect patients to our clinical team, including physicians, nurses, behavioral health specialists and care coordinators through a secure, user-friendly platform. As a result, patients can access resources in an accessible format, ensuring a robust continuity of care and improving health outcomes for patients and families. **In 2025, HarborCHC conducted 14,907 telehealth appointments.**

**JIN JUNG, AGPCNP-C**  
NURSE PRACTITIONER

# IMPROVING HEALTHCARE ACCESS

**Last year, HarborCHC provided case management services to 325 patients, reflecting our commitment to improved access to care for a growing number of patients.** Patients receiving case management support work with our expert team of care coordinators, social workers and clinical staff, who guide patients through appointments, connect them to community resources and address barriers to care. Our team ensures patients and their families have the tools and resources needed to navigate the healthcare system and maintain overall health.

Our Improving Health Care Access badge was awarded because HarborCHC met or exceeded benchmarks in at least one of the following measures: centers earned at least one HCQL or NQL badge or increased service utilization by 5% or more year over year.

## PATIENT STORY

■ Enhanced care management (ECM) is a critical support for patients in vulnerable populations who are navigating multiple complex health conditions. In 2025, one such patient came to us while managing diabetes, hypertension, thrombocytosis, nicotine use disorder, asthma and peripheral vascular disease. Pain and mobility issues made it difficult for her to make appointments, get transportation and otherwise take charge of her health. A HarborCHC ECM case manager helped this patient get her health back on track, by coordinating scheduling, transportation and referrals. With the case manager's support, she attended our wound management clinic. She was able to get stents in both femoral arteries and successfully healed chronic ulcers. She was connected with a physical therapist, who helped her relearn how to walk. Today, the patient has started to walk comfortably, quit smoking, managed her Hemoglobin A1c and blood pressure and is consistently checking in with HarborCHC providers to maintain her progress.

**HARBOR** COMMUNITY HEALTH CENTERS

# LONG BEACH HEALTH CENTER

©LoopNet

## **HarborCHC is excited about the opening of our new Long Beach Health Center, our third location—and our first outside of San Pedro.**

*By opening a new site in a region of high need, we will increase healthcare access by providing comprehensive primary care, behavioral healthcare, addiction medicine and enabling services to underserved residents in the Long Beach area. Thanks to major support from prominent funders in 2025, we broke ground in September and made significant progress on construction by the end of the year, setting us up to open our doors in late April 2026.*

*The LBHC allows us to expand our current high-quality, low- or no-cost healthcare services and extend our reach into a new community. As of 2022, there were 265,000 low-income residents of Long Beach not yet served by an FQHC. With 11 primary care treatment rooms, four behavioral health rooms, a large conference room and expanded space for enabling services, the LBHC is expected to expand our annual capacity by approximately 4,500 patients within a year and a half of its opening.*

# SERVICES PROVIDED IN 2025

HarborCHC delivers quality care to thousands of individuals in the South Bay region of Los Angeles. We strive to provide services that address the diverse needs of our community. In 2025, we were pleased to offer a variety of care options across medical, dental and behavioral health, as well as supportive services.

▲ HARBORCHC PEDIATRIC TEAM

## PRIMARY & PREVENTIVE CARE

Our providers and staff take a team-based approach to patient support. As a proud National Committee for Quality Assurance (NCQA) recognized Patient-Centered Medical Home, we deliver equity-minded care to vulnerable patients, covering a full spectrum of patient needs. Our services range from annual checkups and physicals, screenings and vaccinations to chronic care management, treatment for everyday illnesses and injuries, and more. **Over the past year, 6,119 patients received primary care at HarborCHC.**

## WOMEN'S HEALTH

HarborCHC supports women's health by offering compassionate, affordable and high-quality services tailored to each patient's needs. With an obstetrics and gynecology specialist on staff, patients can receive a variety of preventive care services, including pap smears, family planning and prenatal care. This year, HarborCHC increased mammogram availability through new Saturday offerings, making it even easier for patients to prioritize their health. **In 2025, 1,068 patients received obstetrics and gynecology care at HarborCHC. We also provided 897 mammograms.**

## NUTRITION

Good nutrition improves and sustains health, especially important for those with medical conditions like diabetes, hypertension, high cholesterol, obesity, chronic kidney disease or digestive disorders. *Food as Medicine*, HarborCHC's bilingual healthy cooking series, teaches community members how to prepare healthy meals through free monthly demonstrations. Attendees receive a recipe guide, enjoy a shared meal and discuss components of a healthy lifestyle with registered dietitian Luis Corado, RDN and our nurse practitioner, Evelyn Dresser, NP. Corado is also available for one-on-one appointments to develop meal plans and guidance to patients. **In the past year, HarborCHC held 10 cooking demonstrations at San Pedro United Methodist Church. 414 patients have received nutritional counseling from our registered dietitian.**

### PEDIATRIC CARE

HarborCHC’s pediatric team provides comprehensive care for children and adolescents from birth through age 18, integrating medical, dental and behavioral health services to support every aspect of a child’s development. Our pediatric offerings include routine checkups and annual physicals, vaccinations and developmental screenings, as well as diagnosis and treatment of common illnesses and ongoing care for chronic conditions like asthma. HarborCHC is a partner to the families we serve, and our team empowers every patient and family with the tools and knowledge to confidently make health-related decisions. **In 2025, HarborCHC cared for 1,564 pediatric patients.**

### EARLY CHILDHOOD DEVELOPMENT

Last year, our Early Childhood Development (ECD) program continued to support and improve developmental outcomes. Through regular screenings and health education for families, as well as timely referrals to local regional centers, we ensure patients receive the resources to meet important milestones between the ages of 0 and 5. Our ECD team addresses health-related needs for both children and their primary caregiver, using our “whole child” approach to provide families with tools to support their child’s health. **In 2025, HarborCHC’s ECD program served 56 pediatric patients aged 0 to 5.**

### HIV CARE

Our health centers offer HIV testing, same-day testing for other sexually transmitted infections, free condoms and education on HIV prevention. We also provide access to PrEP (pre-exposure prophylaxis) and PEP (post-exposure prophylaxis) to help prevent HIV infection, participating in community outreach events to expand access to care, provide information and connect people to resources. **In 2025, HarborCHC provided HIV tests to 1,367 patients.**

### PHARMACY CONSULTATION SERVICES

Our clinical pharmacist, Yvonne Alva, Pharm.D., provides direct and indirect patient care through medication management, patient education and collaborative adherence strategies. This support, focused on individual needs, helps promote positive outcomes for our patients with complex and chronic health conditions. **HarborCHC provided approximately 312 hours of pharmacy consultation services in 2025 impacting 204 patients.**

**RACHEL RODRIGUEZ, ACSW**  
**ASSOCIATE CLINICAL SOCIAL WORKER**

## BEHAVIORAL HEALTH

Behavioral health is central to maintaining good physical health, often impacting a patient's ability to care for themselves and their family. As such, HarborCHC takes a proactive and comprehensive approach to care, which starts with behavioral health screenings for all patients who come to us. Due to the stigmatized nature of seeking support for mental health challenges, our team works hard to break down barriers and develop relationships of trust, increasing the efficacy of counseling, medication or behavioral therapies. Our skilled, bilingual team provides patients with comprehensive assessments, as well as culturally responsive individual, family therapy and group counseling sessions, to holistically address a broad range of diagnoses.

**735 patients received behavioral health services last year. HarborCHC offers two psychoeducational groups weekly, one in English and one in Spanish.**

## PSYCHIATRY

Last year, HarborCHC expanded our behavioral health team to include a board-certified psychiatrist, Shribala Kumar, MD. Her experience includes medication management services for adults, older adults, and detention facility inmates in inpatient and outpatient settings, as well as case management and non-pharmacologic treatments. With the addition of Dr. Kumar, we can better support our patients by providing in-house diagnosis and treatment of psychiatric disorders, including medications, for patients experiencing mental illnesses. **Our in-house psychiatrist supported 149 patients in 2025.**

# 2025 A YEAR OF TEAMWORK

**HarborCHC's success would not be possible without our many teams, working together to give our patients the best possible experience. The following are the teams that work to support our award-winning care:**

## **BILLING/FINANCE**

HarborCHC provides high-quality, accessible care to anyone who walks through our doors, regardless of their ability to pay. Our billing and finance team makes this possible. The team ensures focus is on access to care while supporting the financial health of our organization through timely billing practices, compassionate communications with patients and appropriate collection of payments from third-party payers.

## **CARE AND REFERRAL COORDINATION**

HarborCHC's care coordination and referral teams ensure patients receive support to schedule appointments, access benefits and address any needs that might interfere with access to care. These staff members help with community resource connections and overall support to address any gaps in needs.

## **FRONT OFFICE**

The HarborCHC front office staff help patients and providers with accommodating scheduling and friendly interactions. Our front office workers assist in helping patients explore transportation options, follow up on scheduling and help to address any cost concerns.

## **HUMAN RESOURCES**

HarborCHC's team of capable human resource leaders provides administrative support, helps to on-board and recruit new staff, coordinates benefits and plans staff events. They ensure everyone in the HarborCHC family has the tools they need to do their best possible work. Critical to our operations, the human resources department cares for our staff so they are equipped to care for the community we serve.

## **MEDICAL ASSISTANTS**

Medical assistants (MAs) are an essential part of the HarborCHC family, providing support to both patients and providers. These staff members help with intake exams, highlight a patient's most important concerns for a provider and assist clinicians in explaining treatment plans, serving often as the first point of patient care. Our MA team is vital to ensuring the level of quality care our patients have come to expect.

## **OPERATIONS**

Our department managers work together to enhance provider productivity and patient satisfaction, as well as any concerns that arise for our patients, staff or community partners. During

regular meetings, these issues are communicated directly to leadership and reviewed to ensure continued quality care for patients and effective management of daily operations, facilities and technology for our staff of more than 120 dedicated individuals.

## **OUTREACH & ENROLLMENT**

The outreach team at HarborCHC hosts and attends community events, where the team meets and engages with patients and members of the community at local health fairs, vaccine and flu shot clinics, and free health and dental screenings. Our outreach staff coordinates opportunities to provide backpacks and school supplies and toys and games to the children in our community. Our bilingual outreach and enrollment team supports patients and community members with insurance benefits enrollment.

## **QUALITY IMPROVEMENT**

Our Quality Improvement (QI) team helps clinical staff deliver a superior level of care that is responsive to our patients' needs. The QI team leads regular evaluations of our services to ensure we continue to deliver the accessible, whole-person care we are known for.

## **HARBORCHC TEAMS**

*Front Office*

## PATIENT STORY

# ANGELS AT WORK

■ Last year, a gravely ill HarborCHC patient was receiving end-of-life care. He had not seen his children in several years due to immigration barriers. As his health declined, his greatest wish was to reunite with his family who did not live in the United States. Recognizing the urgency of the situation, his HarborCHC primary care physician stepped in, writing a detailed support letter to immigration authorities requesting temporary visas for his children. Because of this advocacy, the patient's children were granted permission to travel to be at his bedside, providing comfort, closure and dignity during the final chapter of his life. The patient and his family expressed immense gratitude, sharing that this opportunity brought peace they never thought possible.

HarborCHC CFO Yessenia Henriquez,  
CEO Tamra King and  
COO Christopher Walter.

## ANGEL LIGHT ACADEMY: ABOVE AND BEYOND AWARD

In November 2025, we were recognized at the annual Angel Light Academy Awards Gala with their Desert Above and Beyond Award, highlighting our compassionate, person-centered care in the Harbor area. This award, describing our staff as "Angels on Earth," reflects the dedication of the HarborCHC team to their patients. We are honored to receive this distinction, which represents our commitment to our patients and accessible care.

## ADAPTING FOR COMMUNITY SAFETY

In 2025, threats posed by an increased presence of immigration officials in our region created new challenges regarding public events. We responded by pivoting our public events within our health centers and community-partner locations. Instead of hosting our annual Back to School Fair we provided backpacks and school supplies to families at their appointments and our Holiday Toy Drive was moved to an appointment-only model. Overdose prevention kits were offered to community partners with on-site education from our SUD team.

These adjustments have allowed our patients to continue to receive support from HarborCHC while staying as safe as possible.

# FUNDER SPOTLIGHT

## LONG BEACH HEALTH CENTER SUPPORTERS

We want to thank our funding partners who have made HarborCHC's new Long Beach Health Center possible. Their contributions will help improve the lives of underserved patients throughout the Long Beach area. We are grateful for their investments, which will expand access to high-quality healthcare for more than 250,000 underserved individuals.

**The Ahmanson Foundation** supports cultural, educational and healthcare projects through funding for non-profit organizations in Los Angeles County. The foundation has continued to evolve their giving in response to the needs of surrounding communities.

Since 1980, the **Crail-Johnson Foundation** has promoted the well-being of children in need through grants that fund education, human services and health. As a long-time supporter of HarborCHC, Crail-Johnson Foundation continues to champion accessible healthcare in the Harbor area.

**The Ralph M. Parsons Foundation** is a responsive grant maker, investing in Los Angeles County organizations which prioritize civic engagement, education, human services and health. Their responsive investments continue to benefit quality of life for residents of Los Angeles.

## Thank You for Your Service, Ida Taylor

HarborCHC is grateful to Ida Taylor, who retired from our Board of Directors in late 2025 after more than 15 years of devoted service to the San Pedro community. A lifelong volunteer and community advocate, Ida strengthened HarborCHC with her wisdom, leadership and unwavering commitment to uplifting others. Her impact reached far beyond our organization: Ida contributed to Councilmember Tim McOsker's campaign, served on Congresswoman Nanette Barragán's Women's Advisory Council and actively supported Justice for Murdered Children, the California Conference for Equality and Justice, and the International Longshore and Warehouse Union (ILWU). She is also a charter member of the Carson branch of Top Ladies of Distinction, Inc., and a member of The Order of the Daughters of the King. We are deeply grateful for her extraordinary contributions and wish her all the best in her well-earned retirement. Thank you, Ida. You will be missed.

# 5-STAR REVIEWS

Here are a few patient comments from our positive Google reviews:

*"Very clean, fast service. Front office, nurses and doctors are all so nice and professional. I loved coming here. They make you feel so comfortable."*

*"Me gusta mucho el servicio. En ingles y en español , siempre te tratan de atender lo más pronto posible. Gracias!!!"*

*"The entire team at Harbor Community Health Centers has been outstanding."*

*"I was nervous because I really don't like going to the doctor. [HarborCHC] made me feel very comfortable and kept me well-informed by answering all my questions and listening to my concerns."*

# OUR LOCATIONS

HarborCHC is continuing to grow for our patients. Visit us at one of our three locations:

**PACIFIC AVENUE HEALTH CENTER**  
425 South Pacific Ave.  
San Pedro, CA 90731

**6TH STREET HEALTH CENTER**  
593 West 6th Street  
San Pedro, CA 90731

**LONG BEACH HEALTH CENTER**  
1040 Elm Avenue, #101 & 105  
Long Beach, CA 90813

## EXPANDED HOURS

*In 2025, we expanded our operating hours after a successful pilot in 2024, directly improving access to care for patients who could not access care during regular weekday hours. In addition to expanded weekday hours for primary care appointments, we now offer additional availability for pediatric, behavioral health and women's health appointments every Saturday.*

# THANK YOU

HarborCHC is grateful for your continued support. To get involved with our work or to learn more about us:
