

We build our image...one patient at a time.

Dear Doctor,

Thank you for your continued referrals and support for Excel Medical Imaging. We appreciate your trust in us to provide the best of diagnostic and interventional radiology services. This letter will serve to further our commitment to you and your patients, and to notify you of an important update here at Excel.

**We are pleased to announce that we have started the upgrade process for our aging PET scanner to a state-of-the art PET/CT. We are now decommissioning our on-site device and will temporarily halt services for PET/CT for a period of 2-3 weeks until mid to late July.**

**A mobile 16-slice PET/CT device will temporarily resume operations in late July for 2-3 months until completion of construction.**

We recommend that patients with urgent PET/CT needs be rescheduled at other outside institutions. Two of our recommendations (based upon personal and patient experience) are listed below:

Gateway Radiology  
2100 1st Ave S,  
St. Petersburg, FL 33712.  
727-525-2121

Gagan Mangat MD, Vimal Patel MD

Advanced Imaging Concepts  
13063 Cortez Blvd,  
Brooksville, FL 34613  
(352) 597-0016

Aruna Medara MD, Naveen Bikkasani MD

***The new device, once installed, will not only provide state of the art PET/CT images, but will also provide cardiac CTA, high resolution vascular CTA, and nuclear cardiac imaging as well.*** With the new device, we will also be able to streamline and expedite CT guided biopsy and tumor ablation procedures for your patients as well.

Please note that our billing codes for PET/CT will change slightly to:

78815 - PET IMAGING CT ATTENUATION SKULL BASE MID-THIGH.

78816 - PET IMAGING CT ATTENUATION WHOLE BODY

78814 - PET IMAGING CT ATTENUATION LIMITED AREA

We are excited to have this opportunity to expand our services for you, and appreciate your patience during our construction. Call or text if you have any questions.

Thanks again, and have a great summer!

Deepak Das MD
