

New Contact Lens Wearers and Training Fee

New contact lens wearers will need to be trained in insertion and removal, as well as proper handling and care, of their new contact lenses. The patient must demonstrate successful insertion and removal of their contact lenses before they may begin wearing them. If additional training is needed, a second training may be scheduled. A contact lens follow up to assess the success of the contact lenses will be scheduled within the following two weeks. Please note a \$20 training fee will be assessed for new contact lens wearers.
