

CostCare Direct Zero Cost and Low Cost Medications

(This list is subject to change depending medication pricing)

CostCare Direct has partnered with Granite Pharmacy to provide our DPC patients with low cost medications. The medications listed below are included under the monthly membership fee. This list of medications can change on a monthly basis as medication cost can change monthly. However most of these medications have fairly stable pricing and unlikely to change. The majority of these medications are prescribed at 90 day intervals.

If your medication is not listed on this sheet you can still obtain medications at a markedly reduced price through Granite Pharmacy. Granite Pharmacy is willing to provide generic medications at cost + \$5 and name brand medications at cost + \$12. These are cash prices and must be paid at the time the medication is picked up at the pharmacy. Granite will not run these prices through your insurance. If you have any questions, please feel free to reach out to your CostCare Direct provider. If you would like pricing on your medications, you can contact Granite Pharmacy directly at 926-2940. You must identify yourself as a CostCare Direct patient to receive the discounts.
