Kyphoplasty

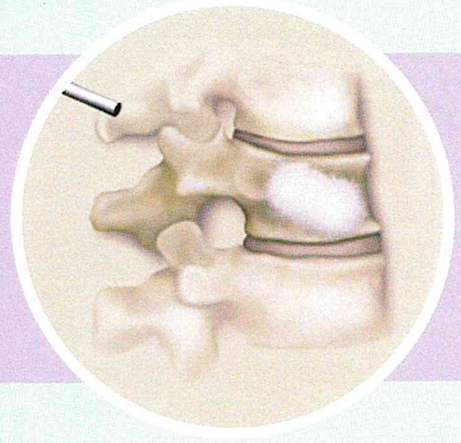

Excel now offers minimally invasive kyphoplasty to stabilize and treat compression fractures of the spine and pelvis.

Fractured Spinal Vertebra

Needle Entry with Balloon Stabilization

Injection of Biological Cement Stabilizes Fracture

- Performed by an interventional radiologist (IR), a physician specializing in minimally invasive procedures and surgeries.
- Same day procedure, WITHOUT the risks of deep sedation or general anesthesia.
- Fast, often same day recovery! Most fractures can be treated with a single small 1 cm incision in the back!
- Proven to reduce overall hospital days, reduce rates of secondary pneumonia, and increase three-year survival compared to conservative management.^{1,2}
- Covered by most major insurances!
